CITY OF BUSSELTON
NOTES TO THE STATEMENT OF FINANCIAL ACTIVITY
For the period ended 31st March 2024

Note 1 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PREPARATION

This prescribed financial report has been prepared in accordance with the *Local Government Act 1995* and accompanying regulations.

Local Government Act 1995 requirements

Section 6.4(2) of the Local Government Act 1995 read with the Local Government (Financial Management) Regulations 1996, prescribe that the financial report be prepared in accordance with the Local Government Act 1995 and, to the extent that they are not inconsistent with the Act, the Australian Accounting Standards. The Australian Accounting Standards (as they apply to local governments and not-for-profit entities) and Interpretations of the Australian Accounting Standards Board were applied where no inconsistencies exist.

The Local Government (Financial Management) Regulations 1996 specify that vested land is a right-of-use asset to be measured at cost, and is considered a zero cost concessionary lease. All right-of-use assets under zero cost concessionary leases are measured at zero cost rather than at fair value, except for vested improvements on concessionary land leases such as roads, buildings or other infrastructure which continue to be reported at fair value, as opposed to the vested land which is measured at zero cost. The measurement of vested improvements at fair value is a departure from AASB 16 which would have required the City to measure any vested improvements at zero cost.

Local Government (Financial Management) Regulations 1996, regulation 34 prescribes contents of the financial report. Supporting information does not form part of the financial report.

Accounting policies which have been adopted in the preparation of this financial report have been consistently applied unless stated otherwise. Except for cash flow and rate setting information, the financial report has been prepared on the accrual basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and liabilities.

THE LOCAL GOVERNMENT REPORTING ENTITY

All funds through which the City controls resources to carry on its functions have been included in the financial statements forming part of this financial report.

All monies held in the Trust Fund are excluded from the financial statements.

Judgements and estimates

The preparation of a financial report in conformity with Australian Accounting Standards requires management to make judgements, estimates and assumptions that effect the application of policies and reported amounts of assets and liabilities, income and expenses.

The estimates and associated assumptions are based on historical experience and various other factors believed to be reasonable under the circumstances; the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The balances, transactions and disclosures impacted by accounting estimates are as follows:

- estimated fair value of certain financial assets
- impairment of financial assets
- estimation of fair values of land and buildings, infrastructure and investment property
- estimation uncertainties made in relation to lease accounting
- estimated useful life of intangible assets

SIGNIFICANT ACCOUNTING POLICES

Significant accounting policies utilised in the preparation of these statements are as described within the 2023-24 Annual Budget. Please refer to the adopted budget document for details of these policies.

Total adjustments to net current assets	(73,249,779)	(107,476,377)	(115,540,817)

CURRENT AND NON-CURRENT CLASSIFICATION

In the determination of whether an asset or liability is current or non-current, consideration is given to the time when each asset or liability is expected to be settled. Unless otherwise stated assets or liabilities are classified as current if expected to be settled within the next 12 months, being the Council's operational cycle.

Note 3 Material Variance Explanations

1032	Financial Services Management	133,469	-	-	100.00%	133,469	-
This unbudge	eted income amount is a result of the transfer of restricted of	leveloper contrib	ution funds held	d aside for activitie	es that were con	npleted/acquitt	ed many years
ago. This wa	s discovered as part of the reserve consolidation process.						
1033	Finance	124,617	72,443	100,867	72.02%	52,174	(5,964)
This positive	variance is a result of the transfer of restricted developer of	contribution fund	ls held aside for	activities that we	re completed/a	quitted many y	ears ago. This
was discover	ed as part of the reserve consolidation process.						
1034	Rates	153,528	24,905	39,709	516.46%	128,624	4,546
The positive	variance is mainly attributable to the 22/23 adjustment to	the Financial A	ssistance Grants	, plus an adjustm	ent paid in rela	tion to the adv	ance payment
made in Jun	e for the 23/24 year, none of which was not known or co	uld have been p	redicted at time	of budgeting (no	te that this iter	n should have	been allocated
against the F	inance cost centre).						
	d Business Development	407,786	422,093	1,005,331	(3.39%)	(14,307)	48,649
1002	Events and Cultural Management	10,500	-	-	100.00%	10,500	10,500
-	relates to the Ballaarat virtual reality project, which was a g		•	•		22/2023. Due t	o delays in the
	milestone payments were not received until this FY. This pro ant in relation to NAIDOC Week, which was not included in t	-		ments have been	made.		
1003	Cultural Precinct	30,906	100,436	210,248	(69.23%)	(69,530)	25,277
	is due to a timing delay with programming for Saltwater. The	· · · · · ·		,	,		
yet been incu				, , , , , , , , , , , , , , , , , , , ,		,	
1041	Property and Land Leasing	204,453	167,572	287,102	22.01%	36,881	2,188
The variance	is due to timing of invoicing of rental income compared to	the spread of th	e budget. There	e is nothing to inc	licate at this sta	ge that the bud	geted amount
will not be as	anticipated at the end of the financial year.

Material Variance Explanations Note 3

	·	Actual YTD	Budget YTD	Full Year Budget	Variance YTD	Variance YTD	Change in Variance Current Month
Cost Centre or Project	Description	\$	\$	\$	%	\$	\$
1042	Aged and Community Housing	61,961	106,301	141,735	41.71%	44,340	8,732

The variance is due to the timing of invoices being issued as there are a number of commitments recorded against the operating expenses for both the Harris Road and Winderlup Villa units. There has also been a delay in obtaining quotes from contractors for certain works.

Community I	Planning	1,441,312	1,910,117	2,515,077	24.54%	468,805	61,132
1011	Leisure Centres	428,407	376,842	477,767	(13.68%)	(51,565)	871

Actuals have exceeded YTD forecast due to unplanned maintenance work required to fix the indoor pool liner and invoicing of the Geothermal license fee occurring earlier than expected. 42,250

61,125

Youth Development Planned large mental health week and Halloween activities/events did not occur due to staffing issues. Investigations have been undertaken regarding other events to be run to meet contractual funding agreement with Rio. The following will now be undertaken between March & April:

• Eeb/ March: Mural art workshops \$3K

•March International women's day; Girls to the Front \$4K

Bth April Bubble Soccer \$1700

•11th April hosted the South West Youth festival \$7k

• 1 2th April Glow basketball \$400

To come:

27th April 2x scooter competition \$5500

27/28th April Mental Health 1st aid \$2k

1046	Building Services	7,247	21,404	28,539	66.14%	14,157	2,276
Caffeenan Itaa	and a few conditions and in half discounting and few conditions.				م: مسمعال ما الم	- 4:: d:ff	

to the building certification registrations of the team.

Statutory Planning 10,645 42,852 57,023 75.16% 32,207

This relates mainly to consultancy spend, which in this area mainly relates to design review or peer review of technical documents (e.g. traffic impact assessments) in support of applications. The timing of that spend largely relates to the lodgement and assessment of applications, and is not determined by the City.

Strategic Planning 81.905 44,326 311.055 430.540 1049 85.75% 266,729

A large proportion of total budget in this area (approx. 280K) is for coastal planning project in the Siesta Park/Marybrook area, and the timing of that spend will be determined by a RFT and subsequent contractual process, but none of that spend has yet been incurred. The variance in this area is entirely attributable to that.

1054 Ranger Services 80,151 142,091 177,121 43.59% 61,939 2,902

Underspend variance can be attributed to the following:

\$37K was budgeted for postage of Firebreak Notice – decision made to send out with rates due to impending changes.

\$26K in various commitments related to animal control, the community engagement associated with the bush fire notice review, equipment and towing services.

Emergency Services 441,399 551,019 734,692 19.89% 109,621 35,524

The main variances relate to budget timing and include:

•⊠ES – Timing of purchases – orders for storm season expected in April

Bush Fire Brigades

old iming of purchases – Large PPC order to be completed in April and invoice expected in June

o 26% reduction of "large" bushfire incidents for January and 18% reduction of "Small" bushfire incidents. Increased frequency of Large fires is directly correlated higher expenditure

oFleet servicing commences May and June

Mitigation works – Timing of works with contractors. Contractors have commenced works and on track for reaching target by end of May

Expenditure is on track in relation to the full year budget. Budget is spread evenly across the year, however purchasing is very dependant on the specific needs of the brigades throughout the year.

Infrastructure and Environment		11,266,565	15,971,730	21,653,663	29.46%	4,705,165	675,580		
1014	Infrastructure and Environment Directorate	11,437	334,988	446,651	96.59%	323,551	29,279		
This is a timi	This is a timing variance only as works have been completed awaiting invoices.								
1016	Construction and Maintenance	1,448,360	1,684,195	2,365,801	14.00%	235,834	16,682		

The main variances relate to budget spread and include:

\$93,647 Bridge maintenance – RFQ awarded and works commenced April

\$83,573 Road Maintenance – expenditure is lower during summer months

Expenditure is on track in relation to the full year budget.

1017	Parks & Gardens	2,522,060	3,085,387	4,117,442	18.26%	563,327	168,804

Activities to date have been largely focused on general Open Space maintenance. This is consistent with lower YTD costs at this time of year compared to YTD budget which is evenly spread over the year. Due to Autumn and Winter seasons, materials and plants order's will be committed with a large amount of expenditure expected in the 4th quarter when they are required, this includes the Street Tree program, Foreshore works (after the tourist season) and sportsground works will be committed.

1018	Major Projects Management	23,502	619	826	(3693.86%)	(22,882)	69
Actuals are or	perational mis-allocations that will be corrected						

Note 3 Material Variance Explanations

	watenai vanance Ехріанаціонs	Actual YTD	Budget YTD	Full Year Budget	Variance YTD	Variance YTD	Change in Variance Current Month
Cost Centre or Project	Description	\$	\$	\$	%	\$	\$
1019	Facilities Services	2,695,944	3,040,741	4,107,318	11.34%	344,798	(48,407)

This is a timing issue only, expenditure will increase at the end of the tourist season (Easter School Holidays) at that point the variance is expected to reduce. It is expected that all funds will be expended this FY.

1020 Engineering and Facilities Services Management 309,292 3,066,367 4,165,954 89.91% 2,757,074 332,736

The main variances can be attributed to the following:

(1) Coastal Works, that's currently in its planning phase, with Coastal Modelling being undertaken. Procurement is currently in full swing for the construction of coastal dune system at West Abbey, these works will be undertaken before the onset of winter. The majority of this funding is associated with the Federal Coastal Grant that the City secured, that's currently in the planning and procurement phase.

- (2) item is street lighting replacement and new installations programs, that's also currently in the planning phase.
- (3) is the Safer Speed Trial JV Initiative grant that is being and rolled out by the RAC, this project is currently in progress.
- (4) is for the General Design and Traffic Modelling, this project is currently being procured for the development of an overall traffic model for Busselton and Dunsborough.

Due to the nature of the four project groups above, all require upfront planning, design and procurement before the bulk expenditure will be recorded. Therefore the variance can be attributed to timing.

1021	Asset Planning	11,128	60,012	80,015	81.46%	48,884	4,484
The underspe	end for this area can be attributed to the timing of the pro-	curement of cont	ractors to assist	with data collect	tion. Subscriptio	ons and membe	rships are also
underspend s	significantly, mainly also due to timing.						
1022	Design and Survey	54,000	30,268	35,357	(78.41%)	(23,732)	(42,089)
Actuals are o	perational mis-allocations that will be corrected.						
1023	Development Control	25,624	74,073	98,764	65.41%	48,448	17,565
There is curre	ent commitments for works underway however waiting on i	nvoices from the	contractor. We	are also waiting o	on the outcome	of an RFQ to av	vard which we
anticipate wi	l utilise the remaining budget.						
1025	Fleet Services	1,908,992	1,730,350	2,307,134	(10.32%)	(178,641)	28,334
Actuals over	YTD budget associated to an increase in Fuels, Oils and Lubri	cants overall. Also	the amount sp	ent and number o	of replacement	parts have incre	ased as well.
1026	Waste Services	2,102,843	2,185,201	3,021,845	3.77%	82,358	78,938

The underspend is in numerous accounts associated with things like lower amounts paid towards water reimbursements to properties external to the Busselton Transfer Station, as well as contractors to process Greenwaste, and the overall use of contractors at the Dunsborough waste facility for the month.

1062	Sustainability	134,093	654,750	873,000	79.52%	520,657	72,750		
Procurement of Stage 3 Vasse River Dredging is due to go to market early February 2024. Works to take place in May/June 2024 for ideal climatic conditions.									
5	Other Expenditure	(3,185,210)	(4,931,346)	(6,823,844)	35.41%	1,746,136	754,332		
Office of the	CEO	86,831	196,958	351,126	55.91%	110,126	34,235		
1000	Office of the CEO	46,985	123,833	147,223	62.06%	76,848	29,135		
The majority of the variance is timing related due to activities involving the use of this budget being difficult to predict when or even if they will occur.									
1031	Stakeholder Relations	39.846	73.125	203.902	45.51%	33.279	5.100		

The Catalyse Community Scorecard invoice will be paid later in the financial year. The You Choose Community Grant Program budget of \$100K was added to the Stakeholder Relations budget in February 2024 and these funds will be expended once grant agreements have been signed following Council's decision in March 2024. It is anticipated that current portfolio commitments will result in the Stakeholder Relations budget being fully expended by the end of the financial year.

Corporate:	Strategy and Performance	760,800	881,099	1,383,915	13.65%	120,299	115,863	
1029	Governance Services	534,703	668,286	898,091	19.99%	133,582	115,858	
The variance is primarily due to the timing of expenditure in the Council Contingency Holding Assessment Passed on surrent commitments expenditure is expected to align								

The variance is primarily due to the timing of expenditure in the Council Contingency Holding Account. Based on current commitments expenditure is expected to align with budget by the end of June.

Economic and Business Development		1,828,342	3,367,919	4,410,944	45.71%	1,539,576	653,555		
1003	Cultural Precinct	14,133	65,486	108,649	78.42%	51,353	6,294		
This is due to delayed timing of marketing and promotions for Saltwater, based on new opening dates for the venue.									
1004	Events	976,045	1,048,265	1,394,788	6.89%	72,220	81,316		

The budget variance in events is due to the timing of funding rounds and payment of milestone invoices. It is expected that all Events budget will be expended by end of FY. There are still two rounds of grant funding to be run and paid from Marketing & Promotions, so the expenditure of that will be determined by the applications received.

1007	Airport Operations	660,562	2,079,965	2,663,611	68.24%	1,419,403	566,827
The majority	v of this expenditure is related to the airline attraction and	marketing & p	romotions activit	ies. Jetstar have	not vet produc	ced invoices for	r the incentive

The majority of this expenditure is related to the airline attraction and marketing & promotions activities. Jetstar have not yet produced invoices for the incentive payment for the last quarter. The City is also still waiting for TWA to invoice the City for \$250k for marketing and promotions activities.

Infrastructu	re and Environment	114,795	97,204	126,210	(18.10%)	(17,591)	(47,071)
1020	Engineering and Facilities Services Management	23,327	1,575	2,100	(1381.11%)	(21,752)	(22,802)
YTD overspend is due to an unbudgeted payment of LSL entitlements to another LGA for a former staff member. This will be offset by a funding transfer fr							from the Long
Service Leave reserve.							
1026	Waste Services	40 686	50 963	67 913	20 17%	10 277	(8.816)

15088	Busselton Depot Building Furniture & Equipment (C)	(2,600)	10,813	10,813	124.05%	13,413	-
This is a tin	ning issue as the purchase of furniture is linked to the refurbish	nment of the train	ing room. Furni	ture purchases wi	ill commence sl	hortly.	
10	Infrastructure	8,328,964	16,122,580	22,293,892	48.34%	7,793,617	(270,234)
Various	Roads	5.264.374	8.098.295	10.141.354	34.99%	2.833.922	(389,469)

The budget spread for the majority of projects in this item is even across the financial year and based on the construction schedule there are some budget timing variances within this item.

The YTD Variance includes the following projects:

- Jalbarragup Road New Shoulders (15085) and Reseal (14853) \$1,014,856 Construction in progress
- Bussell Highway (11199) \$714,686 Construction in progress
- Strelly Street Rehabilitation SLK 0.05 to 1.2 (14851) \$438,864 Construction to commence late April
- Peron Avenue Asphalt Overlay (14856) \$306,900 Construction in progress

	Various	Car Parks	403,401	633,288	713,123	36 30%	229,888	9,687
--	---------	-----------	---------	---------	---------	--------	---------	-------

The budget timing reflects an even spread of expenditure across the financial year, with the exception of Carpark Hotel Site 2, which has the budget spread over July and August. Based on the construction schedule there are some budget timing variances within this item. The YTD Variance includes the following projects:

- Forrest Beach Horse Float Carparking Area (14872) \$135,536 Indigenous heritage consultation with Karri Karrak in progress. Project likely to require relisting into 2024/25 Budget
- Carpark Hotel Site 2 (14815) \$77K project complete and commitments being finalised

	Various	Footpaths & Cycleways	318,196	1,459,709	1,819,587	78.20%	1,141,513	12,146
--	---------	-----------------------	---------	-----------	-----------	--------	-----------	--------

Based on the construction schedule there are some budget timing variances within this item, these include the following projects with the vast majority of works in the 3rd and 4th quarter:

- Forth St to Holgate (14887) \$529,159 Vincent Street to Geographe Bay Road (14895) and Bay View Cresent (14893) shared path projects. RFT01/24 under evaluation and construction planned for April June.
- $\bullet \ \, \text{Townscape Works Busselton (14814) $100,000-Construction scheduled for April/ May. } \\$
- Peron Avenue (14892) \$85,750 Consultation complete and design in progress. Construction planned for April/ May.
- Bayview Street (14888) \$72,577 Construction in progress.
- Carey Street (14890) \$66,434 Planned to follow drainage upgrades in March/ April.

Various Parks, Gardens & Reserves	1,397,062	4,264,084	7,117,075	67.24%	2,867,022	269,134
-----------------------------------	-----------	-----------	-----------	--------	-----------	---------

Note 3 Material Variance Explanations

	·	Actual YTD	Budget YTD	Full Year Budget	Variance YTD	Variance YTD	Change in Variance Current Month
Cost Centre or Project	Description	\$	\$	\$	%	\$	\$

Budget timing for most projects within this item reflect an even spread of expenditure across the financial year. Many projects within this item are currently progressing well:

Below project has not commenced due to project delays

- \$880k Dunsborough Lakes Sporting Precinct (Stage 1)
- \$500k Performing Arts Centre landscaping.
- \$30K Possum Park Barnard East Upgrade
- \$90K underspend Provence SAR Area General Improvements
- \$100K Mitchell Park Landscape Upgrade

There are a number of smaller projects totalling a combined \$1.3 million that are likely to be either carried over or delivered in June 24 due to contractor, equipment and material delays.

Various	Drainage	616,215	805,856	1,104,476	23.53%	189,641	(151,595)		
Budget timing does not reflect construction schedule for projects within this item, which sees projects delivered largely in the 3rd and 4th quarters.									
Various	Regional Airport and Industrial Park	318,244	778,848	1,288,278	59.14%	460,604	(91,164)		

This category is made up of various projects including the Airfield construction, RFDS, Apron lighting, Apron CCTV, GA reseal of which a number have now been awarded, however works have either only just or are yet to commence due to contractor availability.

11 Proceeds from Sale of Assets 418,440 614,800 863,800 (31.94%) (196,360)	(142,680	0)
--	----------	----

Due to the delayed delivery of new, replacement items, the disposal of the existing Fleet and Plant could not occur earlier. Consequently, the under YTD revenue was attributed to the disposal of some Light Vehicles and plant assets only commencing in February 2024. Although revenue from the proceeds of sale is expected to come closer to the budgeted revenue over the coming months, it is not expected to meet the end of year total forecast amount.

Amounts Attributable to Financing Activities	(12,057,188)	16,121,261	30,810,127	(174.79%)	(28,178,449)	(14,592,002)
12 Proceeds from New Loans	-	2,000,000	2,000,000	(100.00%)	(2,000,000)	-

Planning and negotiations for the strategic purchases of land have been delayed, therefore the requirements to apply for and draw down on loan facilities has not been required to date. Also, there have been no aplications for self supporting loans from community groups.

13 Advances to Community Groups		-	(250,000)	(250,000)	100.00%	250,000	-	
	No applications for loan funding have been received from community groups to date.							
	14	Transfer to Restricted Assets	(19,956,566)	(8,961,738)	(9,200,455)	(122.69%)	(10,994,828)	(1,399,032)

At the time of budgeting it is not possible to predict what grants, contributions or developer bonds will be received, and in what timeframe, nor when they will be spent and hence potentially transferred to Restricted Assets (or unspent portions thereof).

Transfers to restricted assets are offset by the incoming receipt, be it a grant, contribution, subsidy or even loan proceeds, so the net impact on the Net Current Position is always nil (once full reconciliation has occurred at year end).

It should be noted that per Council budget amendment resolution, \$8.7M has been moved from reserves to restricted funds in relation to historical developer contributions for community facilities that have not yet been utilised (not recognised in revenue), so could not be included in reserves. The remaining \$11.3M YTD transfers relates to \$2.9M of new developer contributions, \$5.4M in various government grants that were restricted, as well as \$1.3M in Roadwork Bonds, \$517K in BJTP deposits, and \$1.2M in various other deposits and bonds.

15	Transfer from Reserves	30,148,150	43,652,379	60,020,498	(30.94%)	(13,504,229)	(12,194,809)

Although the budget for reserve transfers in the second half of the year has been somewhat shaped to align with predicted completion of some major projects, actual final reconciliation of project spends and the associated reserve transfers are not actually conducted until the end of the financial year.

Amendments sought to DA17/0866

1. Regarding Condition 6.3 -

We are seeking the change for Condition 6.3 to allow trucks to arrive at the pit in the morning from 6.45 am until 7.15 am and leave the pit from 7 am to 7.15 am — with the curfew now being from 7.15 am until 8 am. No extraction, loading etc would be permitted prior to 7 am, simply the parking in the pit of the trucks ready to be loaded and leave.

This time prior to 7.15 is key for the operation of many businesses including ours. It also prevents a backlog of trucks entering and leaving the pit.

The afternoon curfew we are seeking to have amended to 3.45 pm until 4.30 pm.

We are seeking altered operating times due to bus times - Following on from meeting with City of Busselton representatives, including Rachel Runco, and Amanda Watson from the Public Transport Authority, we are needing to amend our pit access times as the current approved times are no longer offering the buffer in time to the school bus due to changes in their pickup and drop offs. The current wording of the DA condition does not allow for changes with any alteration to bus stop schedules.

- 2. With regards to condition 6.4 we are wanting to add to the haulage route currently the only approved route is to follow Chapman Hill Road into Busselton and then along the highway, this makes no allowance for projects that are to the South or West. An additional route to cater to those projects would be to travel along Nuttman, left onto Walsall, right onto Chapman Hill Road, left onto Evans Road, right onto Jamison Road, left onto Payne, then onto Roy Road and onto the highway if required.
 - a. These roads are approved by Mainroads WA for our combinations of
 - b. This relieves some congestion at the round about at the town end of Chapman Hill Road
 - c. And reduces the total time our trucks are needing to be on the road.
 - d. We are aware of the further restrictions that Mainroads has inplace on Evans Road for certain combinations.
- 3. With regards to Condition 6.5 we are seeking an increase in daily truck movements. Through several discussions with the City it is clear the challenges this number presents for Compliance, Engineering and ourselves. To avoid being non-compliant, as we appreciate a weekly or monthly average is not easy for the City to work with, we seek the increase of daily truck movements to 100 for the remainder of the pit life which we estimate to be 1 year. This will cover our work requirements and ensure compliance.

Document Set ID: 5290074 Version: 1. Version Date: 20/12/2023

Application No: DA17/0866

Determination Date: 15 February 2021

NOTICE OF DETERMINATION ON APPLICATION FOR DEVELOPMENT APPROVAL

CITY OF BUSSELTON LOCAL PLANNING SCHEME No. 21

The City having considered the application:

Dated: 16 November 2017

Submitted by: Leeuwin Civil Pty Ltd

On behalf of: B K Baker

Legal Description: Lot 3 DIAGRAM 63148

Lot 2 DIAGRAM 63148

Property Details: Chapman Hill East Road CHAPMAN HILL

Nuttman Road CHAPMAN HILL

Proposal: Industry - Extractive (Gravel)

hereby advise that the Council determined at its meeting on 10 February 2021 (C2102/020) that Development Approval is granted subject to the following conditions:-

GRANT DEVELOPMENT APPROVAL

subject to the following conditions:

GENERAL CONDITIONS:

- The development hereby approved is permitted to operate for five years from the date of this
 Decision Notice or until 170,000 cubic metres volume of material has been extracted, whichever is
 sooner. The site shall be fully rehabilitated in accordance with an approved Rehabilitation
 Management Plan (as approved under condition 3.2) by the expiry date of this development
 approval.
- 2. The owner must ensure that the development is undertaken in accordance with the approved plans and the details contained within the Site and Development Plans and Application Material (Attachment B and C), other than as modified by the conditions below.

PRIOR TO COMMENCEMENT OF ANY WORKS CONDITIONS:

- 3. The owner must ensure that no material is extracted from the site or any other works undertaken until the following plans/details have been submitted to, and approved by, the City:
 - 3.1 Details of a Tree Protection Plan providing for temporary demarcation barriers to be erected to 15m from the crown drip zone of adjacent trees to protect the tree and root system from accidental machinery damage.

- 3.2 A Rehabilitation Plan, to be prepared by a suitably qualified natural revegetation practitioner, incorporating like for like revegetation for the area cleared and to be revegetated with native species to provide habitat for black cockatoos and shall include details of the following:
 - a) Description of the finished profile of the soils of the extraction area post extraction;
 - b) Final ground contours, finished profile with embankments not to be steeper than 1 in 5;
 - Proposed vegetation assemblage for the area post extraction, given the soil profile, topography and a description of the ecological values and functions that are expected to be returned to the revegetation offset site;
 - d) Staging of revegetation process;
 - e) Ripping and/or other treatments to the base of the pit;
 - f) Spreading of stockpiled topsoil;
 - g) Re-use of any stockpiled vegetation;
 - h) Planting methodology, native species list (mix of trees, shrubs and ground covers), planting densities;
 - i) Criteria for assessment of whether the revegetation has been satisfactorily completed;
 and
 - j) Weed management plan.
- 3.4 A revised Water Management Plan, including additional details regarding stormwater retention measures to prevent the flow of stormwater into neighbouring properties.
- 3.5 Details of warning signage to be erected along the transport route. Signage shall include signs on both approaches to the pit along Nuttman Road 100m from the access.
- 3.6 A Dust Management Plan, including details validating the water supply available for dust suppression to implement the approved and procedures associated with management of dust on the unsealed section of the haul route.
- 3.7 Details for the upgrading of the existing crossover to ensure that adequate sightlines are achieved.
- 3.8 Plans for the widening of Nuttman Road to:
 - a) a minimum unsealed carriageway width of 7.0 metres from the crossover to the subject site north to the sealed section of Nuttman Road; and
 - b) Widening of the sealed section of Nuttman Road to 6.2m with 0.80m gravel shoulders (7m formation).

 (such plans shall specify the width, alignment, gradient and type of construction proposed for the upgrades, including all relevant horizontal cross-sections and longitudinal-sections showing existing and proposed levels, together with details of vegetation, pinch points and culverts and where necessary how such culverts will be upgraded).

- 3.9 A 3D Digital Terrain Model indicating the following in Australian Height Datum:
 - a) Existing ground levels;
 - b) Maximum extraction depths; and
 - c) Minimum final ground levels after rehabilitation.
- 3.10 The following bonds being provided to the City:
 - a) A road maintenance bond of \$20,000 (being an unconditional bank guarantee) to ensure that the surrounding road network is maintained to the satisfaction of the City for the term of the extractive industry. Those portions of public roads affected by the activities related to the approval shall be maintained to a standard acceptable to the City at the cost of the owner. The City may use the bond to maintain the affected public roads as it deems necessary.
 - b) A dust bond of \$6,000, which shall be held against satisfactory compliance with the Dust Management Plan.
 - c) A rehabilitation bond of \$30,000, which shall be held against satisfactory compliance with Condition 3.2 of this approval.
 - d) Further to conditions 3.10 (a)-(c) (bond conditions), the bonds are to be accompanied by an executed legal agreement with the City at the full cost of the owner. The legal agreement shall include:
 - The ability for the City to be able to use the bond, or part of the bond as appropriate, and any costs to the City including administrative costs of completing or rectifying any outstanding works on site in accordance with the conditions of this development approval and any further costs;
 - Written authorisation from the owner of the land that the City may enter the site at any time and permit the City to complete or rectify any outstanding work to the satisfaction of the City;
 - iii. If at any time part of the bond is called upon, used or applied by the City in accordance with the legal agreement, the restoration of the bond to the full amount required by these conditions; and
 - iv. The ability to lodge a caveat over the site to secure the City's interest.
- 3.11 Details of a noise bund to the southern boundary to the satisfaction of the City, in addition to the noise reduction measures contained within the Approved Environmental Noise Assessment of Gravel Crushing by Acoustic Engineering Solutions dated 23 October 2020.

PRIOR TO COMMENCEMENT OF EXTRACTION CONDITIONS:

4. The owner must ensure that no material is extracted until information setting out that and how the plans and details required by Conditions 2 and 3 have been implemented, has been provided to the satisfaction of the City, and the City has subsequently issued a 'Permit to Commence', confirming that extraction can commence.

PRIOR TO COMMENCEMENT OF EXTRACTION, OTHER THAN EXTRACTION FOR UPGRADES TO NUTTMAN ROAD:

- 5. Notwithstanding Condition 4 above, gravel can be extracted from and crushed on the site for the purpose of upgrading Nuttman Road and/or the crossover, in the following circumstances:
 - 5.1 Where all plans, details and bonds required by Condition 3 have been provided to and approved by the City, and implemented to the satisfaction of the City; and
 - 5.2 With the prior written approval of the City.

ONGOING CONDITIONS:

- 6. The owner must ensure that the plans, details and works undertaken to satisfy Conditions 1, 2, 3, 4 and 5 are subsequently implemented and maintained for the life of the development and, in addition, the following conditions must be complied with:
 - 6.1 The development hereby approved shall be limited to: the excavation or movement of gravel from its natural state on the site; screening of material; crushing of gravel; transportation of gravel within or off the site; associated drainage works and access ways; and rehabilitation works. At no time shall any blasting works be carried out.
 - 6.2 Operating hours, including the transportation of materials, shall be restricted to the hours between: 7.00am and 6.00pm Mondays to Fridays; and 7.00am and 1.00pm Saturdays for rehabilitation works only; and at no time on Sundays or public holidays.
 - 7.50am and between 4:00pm and 5:00pm on any given school day on a school bus route. Other times may be agreed in writing with the local government.
 - 6.4 The designated haulage route is to the Busselton Bypass, northwards along Nuttman Road to Walsall Road and then north along Chapman Hill Road. No other routes may be used, until trucks have reached the Busselton Bypass.
 - 6.5 A maximum number of 50 truck movements (i.e. 25 trucks entering and 25 trucks exiting the site) shall be permitted on any operating day (i.e. Sundays and public holidays are not operating days). No truck movements are permitted on any other day.
 - Notwithstanding Conditions 6.4 and 6.5 above, should more than 50 truck movements per day and/or an alternative haulage route be proposed, a Traffic Management Plan is to be submitted to and approved in writing by the City; with the Plan being submitted to the City at least 7 working days prior to any haulage not consistent with Conditions 6.5 or 6.6 occurring.

Note: The City will only approve additional movements or alternate routes where it is determined that an acceptable Traffic Management Plan has been provided. The City will not approve additional truck movements and/or an alternative haulage route for more than 20 working days in any calendar year. Any additional days will require a Modification to Development Approval to be submitted to, and approved by, the City.

6.7 No more than 2 hectares shall be worked at any one time; this area shall then be rehabilitated in accordance with the approved details pursuant to Condition 3.2 concurrently with the extraction of the following 2 hectare area.

- 6.8 The lowest level of excavation shall always be a minimum of 300mm above the maximum water table level and no dewatering works are to be undertaken.
- 6.9 Further to condition 6.8 (level of extraction), the final land surface (after rehabilitation for pasture) should be 500mm above the maximum seasonal groundwater.
- 6.10 The approved Rehabilitation Plan shall be implemented and carried out in accordance with the approved details, including any notes placed thereon in red by the City.
- 6.11 The owner must submit to the City annually within three months of every anniversary of the issue of the Permit to Commence certificate a written report detailing the following to the satisfaction of the City:
 - a) A survey conducted by a licensed surveyor certifying:
 - i. The extent/size and location of the area which has been extracted;
 - ii. The extent/size and location of the area which has been rehabilitated;
 - iii. The extent/size and location of the area which is currently under operation;
 - b) Details as to which conditions of this development approval have been complied with and how the conditions have been complied with; and
 - c) No extraction operations, including stockpiling or transportation of extracted material, are to be undertaken on the site at any time when an annual written report is due and has not been submitted to the City.
- 6.12 No development (including any extraction) may be carried out at any time when any bond that is required to be in force and effect under Condition 3.10 is not in full force and effect.

ADVICE TO APPLICANT

- 1. If the applicant and/or owner are aggrieved by this determination, including any conditions of approval, there is a right to lodge a request for reconsideration. The application form and information on fees payable can be found on the City's website.
- 2. If the applicant and/or owner are aggrieved by this determination there may also be a right of review under the provisions of Part 14 of the *Planning and Development Act 2005*. A review must be lodged with the State Administrative Tribunal, and must be lodged within 28 days of the determination being made by the City of Busselton.
- 3. This Notice of Determination grants Development Approval to the development the subject of this application (DA17/0866). It cannot be construed as granting Development Approval for any other structure shown on the approved plans which was not specifically included in this application.
- 4. Please note it is the responsibility of the applicant / owner to ensure that, in relation to Condition 1, this Development Approval remains current and does not lapse. The City of Busselton does not send reminder notices in this regard.
- 5. Please be advised that when forwarding payment of bonds to the City of Busselton, whether it be in person or through the mail, you will need to include a copy of this correspondence (decision on application for development approval) for receipting purposes.
- 6. In accordance with the requirements of the *Local Government (Uniform Local Provisions)*Regulations 1996, you are hereby notified that any vehicle access from the land to a road or other public thoroughfare must be in accordance with the City's adopted Crossover Policy and Vehicle Crossovers Technical Specification.

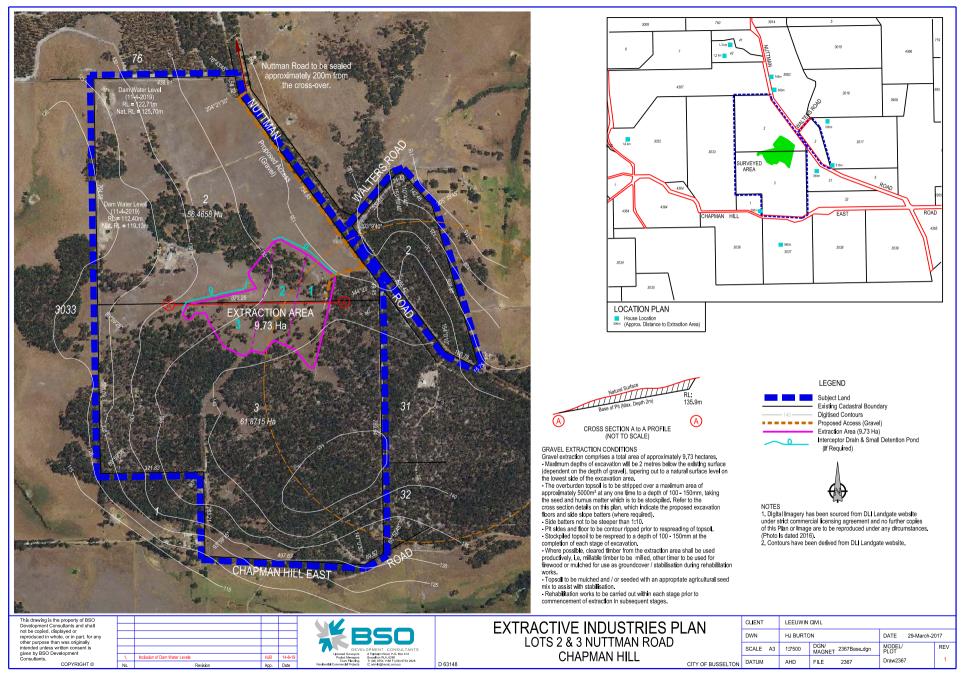

7. In regard to Condition 6.3, the school bus times are likely to vary at the beginning of each school year, the applicant is advised to contact the Public Transport Authority each year for the updated timetable.

APPENDICIES

Appendix A. Complaints Register

Development Application and Works Approval Application Lots 2 and 3 Nuttman Road, Chapman Hill

1 INTRODUCTION

1.1 Background

Leeuwin Civil Pty Ltd (the applicant) is proposing to extract gravel from a 9.73 hectare (ha) area (herein referred to as the subject site) located on Lots 2 and 3 Nuttman Road, Chapman Hill (refer to **Figure 1** and **2**).

It is anticipated that approximately 50,000 tonnes per annum of gravel will be processed. The proposal involves the crushing and screening of gravel within the subject site.

This report has been prepared by Accendo Australia, including information directly inserted from the BSO Consultants correspondence dated 31st October 2017.

1.2 Location and Layout Plans

The subject site is located on the southern boundary of Lot 2 and the northern extent of Lot 3 Nuttman Road. Both Lots 2 and 3 Nuttman Road are wholly owned by Mr Brian Baker (refer to **Appendix A** for Certificate of Title). Authorisation for Leeuwin Civil to act on the landowner's behalf for this proposal has been provided (refer to **Appendix B**).

The subject site is located in the municipality of the City of Busselton, approximately 16 km south of the Busselton central business district. The property is zoned 'Rural' pursuant to the City of Busselton's *Local Planning Scheme No. 21*. The proposed extractive industry is a permitted land use within this zone subject to development approval from the City of Busselton.

The enclosed location plan and site plan identify the proposed extraction areas quite clearly. The subject land is located within Extractive Industry Policy Area No. 3 – Extractive Industry Less Constrained. Extractive industry will be expected to be approved within Policy Area 3, where such operations can meet the requirements of these provisions and the Scheme, provided they do not impact on known areas of titanium mineralisation, nor have an adverse impact on Prime Agricultural land.

The property is well removed from areas known to contain titanium mineralisation.

1.3 Existing and Surrounding Landuses including Extractive Industry

Landuse abutting the boundaries of the subject land is rural based, predominantly grazing, dairying and pastoral landuses, as well as conservation/lifestyle properties immediately to the east.

The Location Plan shows the position of all residences located within one kilometre of the proposed extraction areas. The closest dwellings are to the east and south at distances of approximately 350 and more than 500 metres, they are well screened from the proposed extraction areas by almost continuous remnant vegetation.

1.4 Property Access

Access to the proposed extraction area is provided by Nuttman Road which is proposed to be upgraded by Leeuwin Civil Pty Ltd to an appropriate sealed standard and width, for approximately 200 metres. The trucks will then enter Lot 2 near its northeast corner and traverse this property along an internal gravel accessway which is to be built from the gravel resource to access the extraction area.

As amended by Condition 3.8 - Access and Road Widening

2020

Version 1 Attachment C - Details of Application

1

Development Application and Works Approval Application Lots 2 and 3 Nuttman Road, Chapman Hill

1.5 Visual Impact Management

It is anticipated that the gravel resource will be transported northwards to Chapman Hill Road, which then runs all the way to the Busselton Townsite. The landowners and contractor are committed to installing and maintaining all necessary signage along the haulage route should an approval be granted.

While the extraction area will be partly visible from Nuttman Road, it will be completely screened from all other directions. A row of trees could be retained along the north-eastern edge of the pit to further protect views from the roadway.

2 EXISTING ENVIRONMENT

2.1 Topography and Soils

The natural topography of the subject site increases in elevation in a south-easterly direction. The elevation ranges from 130 metres (m) Australian Height Datum (AHD) to 140 m AHD.

Soils across the subject site are mapped by Tille and Lantzke (1990) and are described as follows:

- Treeton hillslopes phase: Slopes with gradients generally ranging from 2-15% and gravelly duplex (Forest Grove) and pale grey mottled (Munglte) soils; and
- Treeton sandy slopes phase: Slopes (with gradients generally 5-10% but ranging from 2-15%)
 with deep bleached sands.

2.1.1 Acid Sulfate Soils

Acid Sulfate Soils (ASS) is the common name given to naturally occurring soil and sediment containing iron sulfides. They have become a potential issue in land development projects on the Swan Coastal Plain when the naturally anaerobic conditions in which they are situated are disturbed and they are exposed to aerobic conditions and subsequently oxidise. When oxidised, ASS produce sulfuric acid, which can result in a range of impacts to the surrounding environment. ASS that has oxidised and resulted in the creation of acidic conditions are termed "Actual ASS" (AASS), and those that have acid generating potential but remain in their naturally anaerobic conditions are termed "Potential ASS" (PASS).

Mapping prepared by the Department for Planning, Lands and Heritage to support the Western Australian Planning Commission's (WAPC's) Planning Bulletin 64: *Acid Sulfate Soils* (WAPC 2007) does not extend to the subject site. Accordingly, following a review of the *Australian Soil Resource Information System*, the subject site is mapped as having an 'Extremely Low Probability of Occurrence' for ASS (ASRIS 2013).

2.2 Hydrology

2.2.1 Groundwater

The subject site is located within the Busselton-Capel groundwater area as proclaimed under the *Rights in Water and Irrigation Act 1914* (RIWI Act).

During a geotechnical investigation of the subject site, several test pits were excavated to a depth of 3 m from October to the end of November 2015 (BSO 2015). During this investigation, groundwater was not encountered.

The Superficial Aquifer within the subject site forms an unconfined aquifer beneath the Swan Coastal Plain, with a thin saturated thickness of <5 m. The Superficial formation collectively includes the Tamala Limestone, Bassendean Sand, Guildford formation and Yoganup formation. Consequently, there is a large variation in permeability, salinity, recharge rates and soil type (DoW 2009).

The depth of the superficial layer decreases towards the Whicher Scarp, where it becomes a thin layer (0–3m) over the laterite, underlain by the Leederville Aquifer. The aquifer is fully recharged and saturated during the winter months resulting in large areas of water logging. However, the extensive drainage network captures and diverts most of the excess water. Groundwater salinity ranges from < 1000 mg/L towards the southern and western boundaries and increasing towards the coast to > 1000 mg/L (DoW 2009).

2020

We are advised that a few test holes were excavated within the extraction area some time ago, to a depth of approximately 4 metres, and no groundwater was encountered. We do not know where these holes were dug and have not attempted to show the same on the application plan. The lack of water is no surprise, most of Lot 3 is dominated by a substantial ironstone and gravel ridge, this is why it has never been cleared for grazing (insert from BSO Consultants 2017).

There are two stock dams on Lot 2, adjacent to the western boundary, which depict quite different holding abilities. Both are excavated below the caprock layer, with the dam located in the northwest corner having a water level of 122.71mAHD, 2.99 metres below the ground surface of 125.7mAHD on 11th April 2019. There was an obvious water line visible on the wall of this dam at 123.74mAHD which represents its maximum water capacity – 1.96 metres below ground level. This dam also captures some inflow from surface run-off (insert from BSO Consultants 2017).

The second dam is located in a broad, shallow valley which drops away to the west, it had a water level of 112.4m AHD, 6.73 metres below the ground surface of 119.13m AHD. The landowner advises that its level increases by 9 feet (2.75 metres) and is always at least 12 -13 feet (3.98 metres) below ground level. This dam also captures some inflow from surface run-off (insert from BSO Consultants 2017).

This indicates that the groundwater becomes deeper below the ironstone ridge as you head southwards, until it becomes shallow again in the next valley down at Chapman Hill East Road (insert from BSO Consultants 2017).

Extraction of gravel will be to a depth of up to 2 metres, at least 2 metres above the anticipated maximum groundwater level in this area.

2.2.2 Surface Water

The subject site does not contain any defined wetlands (as classified within the *Geomorphic Wetlands of the Swan Coastal Plain* dataset) and is not located within a 'Public Drinking Water Source' area (SLIP 2019).

The subject site is located approximately 20 km south of Geographe Bay and 30 km east of the Indian Ocean. The closest drainage feature is a minor seasonal upper tributary of the Vasse River, approximately 650 m south and west of the subject site. Accordingly, the project will not impact any watercourses.

An attachment is included of an indicative pit floor design, whereby surface run-off will be directed in a westerly direction, consistent with the natural lay of the land. It is more than 300 metres in a west/northwest direction through pastured cattle paddocks before any of that run-off will exit the property, at a grade of just 3%. This will naturally filter any particles/discolouration which could leave the pit before exiting the property. It is not expected that any form of stormwater management will be required rather, large rainfall events will pond in the pit floor before naturally dissipating. The landowner and contractor will monitor this situation at all times and will remedy the situation if this is not the case (insert from BSO Consultants 2017).

No erosion is anticipated, this will be prevented by the gravelly nature of the soil on this ridgeline.

It is also acknowledged that a water licence will be required if water is utilised for dust suppression. This will be available in the two dams described above and a licence application will be lodged if this extractive industry application is approved (insert from BSO Consultants 2017).

2.3 Vegetation and Flora

The subject site is classified as being in a 'degraded' to 'completely degraded' condition (SW Environmental 2017) attributed to a history of agricultural land uses. Native flora species are predominately restricted to

accendo

2020

Version 1 Attachment C - Details of Application

Marri (*Corymbia calophylla*), Jarrah (*Eucalyptus marginata*) and occasional WA Sheoak (*Allocasuarina fraseriana*) (SW Environmental 2017). Given the condition of the subject site, no flora or vegetation of conservation significance is likely to occur within the subject site. The nearest Threatened Ecological Community (TEC) and Declared Rare Flora (DRF) species is mapped over 3 km north-west from the subject site (refer to **Figure 3**).

An application to clear 2.8 ha of remnant vegetation associated with this proposal has been submitted to the DWER (CPS 8746/1).

2.3.1 Regional Ecological Linkages

The South West Regional Ecological Linkages (SWREL) Technical Report (Molloy et al., 2009) shows that the subject site falls within areas identified as 1a: with an edge touching or <100m from a linkage (1.5 ha) or 1b: with an edge touching or <100m from a natural area selected in 1a (0.5 ha). The vegetation within the subject site is therefore considered to be part of a regional ecological linkage (refer to **Figure 3**).

The project however only involves the clearing of 2.8 ha (0.08%), two hectares of which is mapped as a part of SWREL linkage, of the 3,490 ha of native vegetation remaining within five kilometres of the subject site. Accordingly, the impacts of the proposed clearing on Regional Ecological Linkages or native vegetation within the context of the subject site will be negligible.

The subject site is not located within an ecological linkage as defined by Bush Forever, Perth Greenways and the System 6 Report.

2.3.1 Environmentally Sensitive Areas

Section 51B of the *Environmental Protection Act 1986* (EP Act) allows the Minister to declare an Environmentally Sensitive Area (ESA). Once declared, the exemptions to clear native vegetation under the regulations do not apply in these areas. TECs, areas within 50m of any DRF and defined wetland areas constitute ESAs. However, a number of other areas of environmental significance are also listed. Current declared ESAs are listed in the Environmental Protection (Environmentally Sensitive Areas) Notice 2005.

The subject site is not mapped within an ESA. The closest ESA is located approximately 3.2 km from the subject site (refer to **Figure 3**).

2.4 Fauna

In consideration of vegetation condition and species present within the subject site, fauna habitat is predominately restricted to black cockatoos (Forest Red-tailed black cockatoo (*Calyptorhynchus banksii naso*), Baudin's black cockatoo (*Calyptorhynchus baudinii*) and Carnaby's black cockatoo (*Calyptorhynchus latirostris*)). A *Black Cockatoo Habitat Assessment* (SW Environmental 2017) was undertaken within the subject site whereby it was identified that 2.8 ha of black cockatoo breeding and foraging habitat would be impacted by the proposal.

Accordingly, approval from the Commonwealth Department of the Environment and Energy (DotEE) was sought whereby it was determined that the proposed clearing is not a controlled action and therefore approval is not required pursuant to the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) (refer to **Appendix C**).

2.5 Aboriginal Heritage

An online search for relevant Aboriginal heritage information was undertaken using the Department for Planning, Lands and Heritage (DPLH) *Aboriginal Inquiry System* that incorporates both the heritage site register and the heritage survey database (DPLH 2019). The Aboriginal Heritage Site Register is maintained pursuant to Section 38 of the *Aboriginal Heritage Act 1972* and contains information on over 22,000 listed Aboriginal sites throughout Western Australia.

Results of the database search revealed that no Aboriginal heritage sites are present within the extraction area. Nonetheless, it is important to note that Aboriginal heritage sites may still exist in or adjacent to the subject site that are not yet known, or may not yet been listed on the Aboriginal Heritage Register.

2.6 Sensitive Receptors

The Environmental Protection Authority's (EPA) *Guidance for the Assessment of Environmental Factors* (June 2005) provides generic separation distances to assist in the determination of suitable buffers where industry may have the potential to affect the amenity of a sensitive land use. In particular, for extractive industries, a buffer distance of 300 m to 500 m is recommended from sensitive land uses.

The closest residential dwelling to the subject site is 320 m to the south, as shown in Figure 4.

Land use abutting the boundaries of the subject land is rural based, predominantly grazing, dairying and pastoral land uses, as well as conservation/lifestyle properties immediately to the east.

3 MOBILE CRUSHING AND SCREENING PROCESS

3.1 Area of Disturbance

The gravel quarry will cover an area of approximately 9.73 ha with a maximum natural elevation of 140m AHD. Maximum depths of excavation will be approximately 2 m in the southern sectors, becoming much shallower as the extraction progresses northwards. Excavation will occur in three stages, each approximately 3.24 ha, over a five year period.

It is estimated that the total maximum volume of gravel to be removed from the three cells will be approximately 170,000 banked cubic metres and the landowners request that their permit be given the longest lifespan allowable (5 years).

3.2 Description Overview

All crushing equipment and infrastructure at the subject site will be fully portable to facilitate movement throughout the site required for staged quarrying operations. The following equipment could be present at the subject site throughout operations:

- Light vehicles;
- Excavator;
- Service truck;
- Mobile crushing and screening plant;
- Front end loader;
- Tip truck;
- Site office;
- Ablutions.

The commencement of operations is proposed in the second half of 2020 (subject to obtaining all approvals). The estimated construction costs to mobilise the crushing and screening equipment is \$139,630 (refer to **Table 1**). The only cost associated with the infrastructure outlined in this works approval application is the hire and mobilisation of equipment to the subject site. Operating hours will be restricted to 7:00am – 6:00pm, Monday to Friday. It should be noted that the quarry will operate on a campaign and as needs basis.

Table 1. Estimated construction costs.

Timing	Details
Category	12 – Screening, etc. of material
Capacity Range	More than 50,000 but not more than 100,000 tonnes per year
Total Cost	Equipment Hire - \$138,580.00 Mobilisation to site - \$1,050.00 Total Cost - \$139,630.00 More than \$100,000 but not more than \$150,000 - Rate 45
Total Fee	\$1,827.00

The key project characteristics associated with the proposal are provided below in Table 2.

2020

Version 1 Attachment C - Details of Application

Table 2. Project characteristics.

Characteristic	Description
Quarry life	Five years
Total resource	Approximately 50,000 tonnes of gravel per annum
Project footprint	9.73 ha
Vegetation clearing	2.8 ha within extraction area (CPS 8746/1). No other vegetation clearing required.
Operating hours	7:00am – 6:00pm, Monday to Friday
Storage shed	A storage container may be located in the fenced compound for the overnight storage of valuable equipment.
Fenced compound	A compound area will be fenced to secure equipment and restrict public access.
Dump truck	A dump truck will be used to transport material within and from the site.
Water Tankers	A 10,000L water tanker or similar will be used for dust suppression on the access road and working floors as required.
Bulldozer (D8)	Topsoil will be stripped using a bulldozer to a maximum depth of 150mm. bulldozers will also be used for the movement of gravel and loading road trucks.
Excavator (325/330)	An excavator may be used for the removal of gravel material.
Loader (938/966)	Loaders will be used for the movement of gravel and loading road trucks.
Terex Finlay I-140 Impact Crusher	Used for the crushing of gravel.
Terex Finlay 693 Supertrak	Used for the screening of crushed gravel.
Anaconda Radial Stockpiler	Used for stockpiling crushed gravel.
Toilets	A portable toilet may be required onsite.
Generator	A generator may be required to provide power to a variety of equipment.
Water usage	Water will be trucked to the subject site as required.
Waste	All waste products will be stored in appropriate rubbish bins (recycling, putrescible, and hydrocarbons will be separated in lidded bins) and removed from site by a contractor at regular intervals and disposed of at the licensed landfill facilities. There will be no landfill on site

Onsite facilities will be kept to a minimum and importantly no fuel or chemicals will be stored onsite.

3.3 Mining Operations

It is anticipated that approximately 50,000 tonnes of gravel will be extracted each year, depending on supply and demand. The above factors suggest an average of seven additional truck movements per day but this will be dependent on demand.

The topsoil (nominally 15 cm of the soil profile) will be stripped and stockpiled behind the excavation face using a bulldozer or loader. Where possible and if the perimeter bunding is already present, topsoil will be

directly transferred to an area being rehabilitated. Overburden, if present, will be removed using a dump truck and stockpiled to the perimeter of the proposed pit area.

3.3.1 Gravel Extraction

The gravel within the subject site can be removed with an excavator or loader without the need for blasting. The material will then be crushed and screened to produce products of the correct size.

A summary of the proposed extraction activities is provided below:

- Prior to excavation commencing the site will be ground surveyed, the excavation footprint marked out and a 1 metre contour plan developed.
- Remove the vegetation cover by pushing it into windrows for use on the batters to minimise soil erosion and assist spreading on the final land surface as part of the final rehabilitation.
- All topsoil will be removed for spreading directly onto areas to be revegetated and screening or
 perimeter bunds. If direct spreading is not possible the topsoil will be stored in low dumps, for
 spreading at a later date.
- Soil and overburden will then be removed and either directly transferred to a rehabilitation area or stored in low dumps for later rehabilitation use.
- An excavator or front-end loader will be used to excavate the gravel material.
- The material will then be picked up by a rubber tyred loader and fed to the mobile crusher.
- A loader will then transfer the laterite rock into the crusher where it would be reduced to smaller sizes and transferred to an adjoining screener. The screener then sorts the gravel into various sizes for stockpiling. On an as needed basis, gravel product will be loaded on to road trucks of various configurations for transport off-site.
- All static and other equipment, such as crushers and screens (where used), will be located on the floor of the quarry to provide visual and acoustic screening.
- Upon completion of each section of quarry the section will be reformed and back filled, where subgrade material is available, to achieve the proposed final contours.
- At the end of excavation, the floor of the quarry will be deep ripped, covered by overburden and topsoil, and rehabilitated to a constructed soil.

The likely initial position of plant equipment (crushers, loaders and screeners) will be within the floor of the existing excavation area (refer to **Figure 5**); although as such equipment is mobile it could subsequently be relocated when needed for more effective positioning in relation to areas of excavation.

Stockpiles will be located on the floor of the pit and will be a maximum of 4 metres high, which, with the lowered elevation of the pit floor and perimeter bunding of topsoil, will mean that the stockpiles are not anticipated to be visible from Nuttman Road.

3.3.1 Rehabilitation

During operations, quarrying and rehabilitation will be undertaken progressively. Following quarrying of each stage, rehabilitation will be undertaken.

Upon completion of each cell, the following completion criteria will be achieved:

- A self-sustaining cover of pasture;
- Weed levels that are not likely to impact on the viability of the reconstructed soils; and
- A safe and stable landform suitable for the proposed future land use which will be productive, grazing pasturelands. - As Amended by Condition 3.2 - Rehabilitation Plan to be submitted

2020

Version 1 Attachment C - Details of Application

3.4 Crushing and Screening Equipment

3.4.1 Installation

Due to the mobile nature of the crushing and screening equipment, installation at the subject site will be very simple. The 'plug and play' equipment does not require earthwork s or significant construction and therefore has a low risk of noise and dust generation during this phase.

3.4.2 Operation

The crusher and screening plant will be located on the pit floor during campaigns when gravel material is being produced. The mobile crushing and screening equipment used is modular and interchangeable. The crusher and screens can be configured differently for the production of several gravel products. The plant is equipped with dust covers for dust management.

3.5 Proposed Operating Times

Operation of the pit will be constrained between the hours of 7am and 6pm Monday to Friday, and it is not proposed to include public holidays. Should individual contracts require operation outside these times, our clients are committed to notifying Council accordingly, outlining the specific details of the contract.

It should also be noted that trucks may not operate on designated school bus routes between 7.30 – 8.40am and 3.20 – 4.20pm, Monday to Friday, during school periods. The pit operators will be careful to ensure compliance with these requirements. - As amended by Condition 6.3 - Revised School Bus Curfew

3.6 Staging of Operation

The site plan shows clearly the proposed areas of excavation. Our clients are committed to rehabilitating the area upon completion of the extraction and this rehabilitation will be commissioned at an appropriate time of the season when the respread topsoil will germinate and stabilise quickly i.e., during the months of late May to September. No more than 2.0 hectares of extraction area will be exposed at any time prior to rehabilitation commencing.

3.7 Number of Truck Movements Per Day/Week

Assessment of the estimated banked volume of 170,000 cubic metres against the truck movement calculations contained within the Policy, leads to an average removal volume of 131 truck cubic metres per day (five days per week over five years).

Based on the 19 cubic metre capacity of a semi-trailer, this equates to less than 7 additional truck movements per day, on the local road network. Obviously, this is likely to fluctuate however, at this stage, average truck movements are all that can be estimated. - AS amended by Condition 6.5 - Truck Movements

3.8 Haulage Routes and Destinations

The haulage routes and destinations will be subject to specific contracts however for the most part, the resource can be transported anywhere once it reaches the Chapman Hill Road/Busselton Bypass intersection. Our clients are committed to advising Council of specifics as contracts are prepared.

4 ENVIRONMENTAL IMPACTS AND MANAGEMENT

The following factors are considered to represent the potential environmental and amenity impacts associated with the proposal:

- Hydrology;
- Dust;
- Noise
- Dieback and weeds; and
- Uncontrolled discharge of contaminants to land.

These environmental factors are discussed in more detail below, together with the proposed management actions.

4.1 Hydrology

4.1.1 Surface Water

The subject site does not contain any defined wetlands (as defined within the *Geomorphic Wetlands of the Swan Coastal Plain* dataset) and is not located within a 'Public Drinking Water Source' area (SLIP 2019). Furthermore, the subject site is situated on a broad ridgeline well removed from any defined drainage lines or watercourses.

Construction

The mobilisation and positioning of equipment associated with a Category 12 prescribed premises is not associated with any impacts to surface water, including stormwater runoff.

Operation

The operation of the screening and crushing plant will be a dry operation.

To minimise any potential impacts associated with sedimentation and erosion from stormwater runoff during the operation of the crushing and screening equipment, holding ponds for each Stage will be located at the base of the pits.

These ponds will be designed to retain surface water runoff from the two-hour 10 year average return interval storm event. Cut-off drains running along the base of the pit, parallel to the western boundary, will ensure all runoff is diverted into the detention ponds.

During excavation activities, the surface will be internally drained. A low bund will be installed down slope of any excavation area in the gravel, established from the wall of the pit to the edges of the excavation. The processing area will also be bunded by a low bund to ensure no surface water runoff occurs.

Risk Assessment

A risk assessment relating to surface water and stormwater runoff in consideration of the proposed management measures is provided below. The residual risk associated with sedimentation and erosion from stormwater runoff during the operation of the crushing and screening equipment is considered Low.

Table 3. Risk assessment associated with surface water and stormwater.

Hazard	Source of Hazard	Potential Impacts	Mitigation	Likelihood	Consequence	Residual Risk
Erosion and sedimentation	Uncontrolled and contaminated stormwater runoff	Erosion and sedimentation resulting in poor surface water quality.	Installation of holding ponds to retain surface water. Bunding of the process excavation area to ensure that stormwater is contained within the excavation footprint.	1	2	Low

4.1.2 Groundwater

Groundwater will not be extracted or dewatered during the operation of the quarry and therefore, no impacts to groundwater levels are proposed. There will be no interaction with groundwater given that the proposed maximum depth of excavations will be 2 m below ground level.

The extraction and processing of gravel is a chemically free operation with the liquids used being lubricants for machinery and fuel. There will be no storage of chemicals or fuel on the subject site.

Construction

The mobilisation and positioning of equipment associated with a Category 12 prescribed premises is not associated with any impacts to groundwater.

Operation

The operation of the screening and crushing plant will be a dry operation and is not associated with any impacts to groundwater.

4.2 Dust

In accordance with the EPA (2005) Guidance Statement No. 3 Separation Distances between Industrial and Sensitive Land Uses, the recommended separation distance between an extractive industry and a residential dwelling is 300-500m. As previously discussed, the closest dwellings are to the east and south at distances of approximately 350m and more than 500m, and they are well screened from the proposed extraction areas by almost continuous remnant vegetation.

Construction

The mobilisation and positioning of equipment associated with a Category 12 prescribed premises is not associated with any significant dust emissions.

Operation

Potential dust emissions may impact the amenity of nearby residents and the environmental values of the surrounding landscape. An assessment of dust emissions is provided below.

Wind Direction

During the summer months the dominant wind in the mornings is from the south-east at 10-14 knots, swinging to the south-west at 20-25 knots in the afternoon. During winter, the winds are most commonly 10-14 knots with no dominant prevailing direction. During storms, winds from the west and north-west can reach 40 knots (BoM 2020).

Dust Sources

The proposed extraction activities will involve the disturbance of soil and earthen material. Specifically, this may include the following activities:

- Earthworks during extraction activities;
- · Topsoil stripping;
- Loading and transportation of material;
- Vehicle movement within the site;
- · Crushing and screening of material; and
- Wind erosion of exposed surfaces.

These activities have the potential to generate dust that, if not adequately controlled, can cause nuisance and safety risks. In-pit operations tend to generate less dust than surrounding activities due to the reduced airflow within the pit. The removal and replacement of topsoil material has the highest risk associated with dust generation due to the large volumes of material involved and generally lower levels of soil moisture.

Risk Assessment

In accordance with the DWER's "A guideline for managing the impacts of dust and associated contaminants from land development sites, contaminated sites remediation and other related activities", a risk assessment for dust emissions has been prepared.

For a site that is generating uncontaminated dust, such as extractive industry sites, the site classification chart in Appendix 1 of the DWER guideline can be used for assessing the site risk. Appendix 1 also details the provisions and contingency arrangements for dust management which apply to each site classification score.

The site classification assessment is provided below.

Part A. Nature of site

Item		Score Options			
1.Nuisance potential of soil when disturbed	Very low - 1	Low – 2 Soils with a dominant particle size corresponding to gravel size or larger have less potential of becoming airborne than finer particles such as fine sand.	Medium - 4	High - 6	2

2. Topography and protection provided by undisturbed vegetation	Sheltered and screened - 1	Medium screening – 6 The extraction area is extensively screened by remnant vegetation.	Little screening - 12	Exposed and wind prone - 18	6
3. Area of site disturbed by the works	Less than 1ha - 1	Between 1 and 5ha – 3 Only 2ha will be excavated at any time. Rehabilitation will be progressive denoting that the area of disturbed land will be limited to 2ha.	Between 5 and 10ha - 6	More than 10ha - 9	3
4. Type of work being done	Roads and trenches - 1	Roads, drains and medium deep sewers - 3	Roads, drains, sewers and partial earthworks - 6	Bulk earthworks – 9 Gravel extraction	9
Total score for Part A	\				20

Part B. Proximity of site to other land uses

Item	Score Options				Score
1.Distance of other land uses from site	More than 1km - 1	Between 1km and 500m – 6	Between 100m and 500m – 12 The closest dwellings are to the east and south at distances of approximately 350m and more than 500m.	Less than 100m - 18	12
2. Affect of prevailing wind direction (easterly) on other land uses	Not affected - 1	Isolated land uses affected by one wind direction – 6 The closest dwellings are to the east and south.	Dense land uses affected by one wind direction – 9	Dense/sensitive land uses highly affected by prevailing winds - 12	6
Total score for Part	A		1		18

Based on the risk assessment, a site classification score (A x B) of 360 has been provided. This results in a Classification 2 which is considered a low risk (score between 200 and 399 is considered low risk, DWER 2011). The provisions, contingency arrangements and monitoring requirements as specified by the DWER (2011) associated with a Classification 2 proposal are provided below.

Provisions:

The developer shall supply a contingency plan to the local government, which shall detail the activities to be undertaken should dust impact occur.

Contingency arrangements:

Include an allowance for water-cart operation, wind fencing and surface stabilisation during construction period for the purposes of dust suppression.

All areas of disturbed land should be stabilised to ensure that the disturbed area exposed at any time is kept to a practical minimum.

Monitoring requirements:

Complaints management system in place.

Notice to be erected at the site providing contact details of the person to be contacted.

Management Measures

Based on the results from the risk assessment and in consideration of the separation distances to sensitive receptors, the following dust management measures are proposed.

Exposed Surfaces

Dust from stockpiles, un-stabilised surfaces and access roads will be suppressed with water applied by an onsite watercart with a capacity of 15,000 L. Water will be trucked to the site from an offsite source.

The volumes of water required will be dependent on the prevailing weather conditions. An estimated volume of water required for dust suppression is provided below in **Table 4**.

Table 4. Parameters for estimated water requirements for dust suppression.

Parameter	Volume/Number
Truck movements in summer	Average of 7 movements per day (depending on demand)
Volume of watercart	15 kL
Estimated days of watercart operation	120
Estimated average daily use	45 kL
Estimated annual use	5,400 kL

Material Transport

Material transported from the subject site will be carried in truck bodies of various configurations. During transport of the gravel material, dust can be generated. Accordingly, the proponent will implement the following measures to reduce dust during product transportation:

• Truck loads will be covered with tarpaulin or similar.

Processing Material

Crushing, screening and stockpiling the gravel material has the potential to generate dust. The crushing and screening plant will be fitted with dust covers to prevent dust emissions from this operation.

Crushing and screening will be undertaken in designated areas with the greatest natural protection from winds (concealed at the lowest contours) which simultaneously minimise wind-borne dust emissions and dissipate noise emissions. Excavation and processing will be conducted on the floor of the pit, 2m below natural ground level behind the excavation face.

Rehabilitation

The proposed extractive industry operation is staged. Accordingly, rehabilitation will be undertaken sequentially and as soon as reasonably possible to reduce the exposed areas. Where rehabilitation is delayed (i.e. staged completion occurs in summer), additional dust control measures will be considered. This includes the application of a paper-water mixture to exposed surfaces to create a temporary crust and prevent wind-borne dust lift-off.

Summary

The potential impacts to amenity from dust emissions are considered low with the application of suitable management measures. A summary of these proposed management measures is provided in **Table 5**.

Table 5. Dust management measures.

Timing	Management Measure
Topsoil removal,	Stockpiles, where possible, will be limited to the anticipated cubic volume/vehicle movement for cartage on the following operating day.
excavation and rehabilitation	Stockpiles will be configured to accommodate easy access for watering/dust minimisation if required.
activities	Access roads and immediate extraction areas will be watered as required.
	Topsoil stockpiles and exposed areas will be watered and stabilised as required. Stabilisation techniques that will be considered depending on environmental conditions will include hydro-mulching.
	Timing of earthworks (daily and seasonally) will coincide with periods of low wind velocity as far as practicable. This will especially need to be considered during summer with the prevailing easterly winds.
	Truck loads to be covered by tarpaulins or similar.
	Crushing and screening plant to be fitted with dust covers at all times.
	Visual monitoring of dust will be ongoing throughout the day during operations. When dust emissions are observed, dust suppression measures will be implemented immediately.
	 Erect on-site signage directing public to make complaints to the relevant person. Maintain a complaints register (refer to Appendix D). A Complaints Register will be established to record the date, nature, and resolution action of any complaints. Complaints will be directed to the site supervisor for resolution. If the complaint is verified as being due to a site source, remedial action will be undertaken within 2 hours.
	The City will be advised of all complaints as soon as they are received.

Timing	Management Measure
	• If a compliant cannot be resolved within the 2 hour response period, it may be necessary
	to cease operations.

4.3 Noise

Noise from construction sites in Western Australia is governed by the *Environmental Protection (Noise) Regulations 1997*. The Regulations state that construction work can be carried out between 7.00am and 7.00pm on any day which is not a Sunday or a public holiday provided:

- The construction work is carried out in accordance with control of environmental noise practices set out in Section 6 of AS 2436-1981 Guide to Noise Control on Construction, Maintenance and Demolition Sites.
- The equipment used on the premises is the quietest reasonably available.
- Construction outside these times and days if approved by the Chief Executive Officer of the Department of Water and Environmental Regulation (DWER).

As previously discussed, the EPA (2005) Guidance Statement No. 3 Separation Distances between Industrial and Sensitive Land Uses recommends a separation distance between an extractive industry and a residential dwelling of 300-500m. The closest dwellings are to the east and south at distances of approximately 350m and more than 500m.

Construction

The mobilisation and positioning of equipment associated with a Category 12 prescribed premises is not associated with any significant noise emissions.

Operation

The construction works will involve the use of machinery and equipment that will generate noise during operation. Sources of noise from the subject site will include:

- Machinery noise from equipment use.
- Noise from safety equipment (beepers on machinery).
- Noise from trucks departing the site.

Reversing alarms can represent significant nuisance noise to sensitive receptors. There are a number of alternatives to alarms that maintain a safe work environment and also comply with occupational health and safety legislation. Reversing alarms alert pedestrians when a vehicle is moving, however, given that no pedestrians will be onsite (private property), the applicant has committed to using flashing lights or a broadband alarm system as an alternative. The sound of a broadband alarm is much less intrusive by nature than the sound of a tonal alarm and tends to be masked by the background noise at a lesser distance. This will eliminate/reduce noise emissions associated with reversing alarms.

Noise Barriers

Noise impacts on sensitive receptors are dependent on distance and line-of-sight. The proximity to residential dwellings has been determined (refer to **Figure 4**). Topography and existing vegetation naturally create screening from noise, dust and visual impacts between the proposed extraction area and sensitive receptors to the subject site.

Distance, obscured landform and vegetation cover (primarily in the form of large trees) over at least 350m indicates that noise impact is expected to be manageable. To further ameliorate potential noise impacts, it is proposed to establish topsoil stockpiles around the periphery of the working pit.

Wind Direction

Annual wind data has been obtained from the Busselton Bureau of Meteorology station (ID: 009603), located approximately 15 km from the proposed extraction area. Speed and direction frequency wind roses indicate winds at Busselton are bimodal, with the two dominant directions of east and west. The land-sea breeze cycle dominates the prevailing winds of the region, particularly over summer, with moderate easterly winds in the morning and stronger southerly sea breezes in the afternoon commencing around noon and weakening during the evening. The sea breeze may occur in all seasons, although it is most frequent and intense during the summer months.

During the summer months the dominant wind in the mornings is from the south-east at 10-14 knots, swinging to the south-west at 20-25 knots in the afternoon. During winter, the winds are most commonly 10-14 knots with no dominant prevailing direction. During storm events, winds from the west and north-west can reach 40 knots.

Wind can carry noise greater distances than expected, or conversely disperse noise more quickly. With noise sensitive premises located in a south and east direction from the proposed extraction area, an analysis of the wind rose data has yielded the following conclusions:

- During the summer months, the morning prevailing easterly wind may direct noise in a westerly direction, whilst the afternoon sea breeze may direct noise in an easterly direction; and
- During the winter months, storm winds are from the west which may direct noise in an easterly direction.

Management Measures

The applicant will ensure that all noise emissions will comply with the requirements of the *Environmental Protection (Noise) Regulations 1997* at all times. Management of the operational processes associated with the extractive industry can further reduce any adverse noise impacts.

Crushing and screening will be undertaken in designated areas with the greatest natural protection from winds (concealed at the lowest contours) which simultaneously minimise wind-borne dust emissions and dissipate noise emissions. Excavation and processing will be conducted on the floor of the pit, 2 metres below natural ground level behind constructed perimeter bunds.

Similarly, gravel excavation will occur below natural ground level. The excavation walls will act as a noise insulator for operations in the pits.

In addition, the management measures prescribed within **Table 6** will be implemented to reduce noise emissions as far as practicable.

Table 6. Management actions for noise.

Objectives	Action	Timing			
Ensure staff, contractors, and subcontractors are aware of noise impacts.	Ensure all personnel are appropriately inducted prior to any site works.	Prior to construction works			
Management of equipment and machinery noise.	Establish a topsoil bund around the periphery of the working pit.	At all times			

accendo

2020

Version 1 Attachment C - Details of Application

Objectives	Action	Timing
	 Use machinery and equipment with minimal noise output levels. Ensure all machinery is regularly serviced as per the equipment's maintenance schedule. Use flashing lights/broadband alarms instead of tonal reversing alarms on excavators/loaders. Apply speed restrictions and a ban on exhaust braking if required. 	
Minimise disturbance to local residents.	Maintain levels of noise and vibration in accordance with the <i>Environment Protection (Noise) Regulations 1997</i> and the <i>AS2436-2010 Guide to noise and vibration control on construction, demolition and maintenance sites.</i> This is to be achieved by implementing the abovementioned management measures.	At all times
Management of Public Concerns	 Erect on-site signage directing public to make complaints to the relevant person. Maintain a complaints register (refer to Appendix D). A Complaints Register will be established for the site to record the date, nature, and resolution action of any complaints. Complaints will be directed to the site supervisor for resolution. If the complaint is verified as being due to a site source, remedial action will be undertaken within 2 hours. The City will be advised of all complaints as soon as they are received. If a compliant cannot be resolved within the 2 hour response period, it may be necessary to cease operations. 	At all times

Risk Assessment

A risk assessment to determine the residual risk associated with noise emissions is provided below. The risk assessment indicates that with the application of suitable management measures the potential risk associated with noise emissions is 'Low'.

Table 7. Risk assessment associated with noise emissions.

Hazard	Source of Hazard	Potential Impacts	Mitigation	Likelihood	Consequence	Residual Risk
Noise emission	Excavation machinery and processing	Noise impacts to neighbouring properties	Refer to Actions provided in Table 6 .	1	2	Low

4.4 Hydrocarbons and Dangerous Goods Management

Hydrocarbons are the only dangerous goods that will be utilised within the proposed extraction area for the operation of machinery. However, storage of hydrocarbons on the subject site will not occur.

Construction

The mobilisation and positioning of equipment associated with a Category 12 prescribed premises is not associated with any uncontrolled discharges of contaminants to land.

Operation

There is the minor possibility for soil and water contamination as a result of incidental hydrocarbon leakages or spills during the operation/refuelling of machinery. In such instances the management measures specified below will be implemented. It is also noted that there are no watercourses within or in proximity to the extraction area.

Table 8. Hydrocarbon and dangerous goods management measures.

Timing	Management Measure
During quarry operations	Mobile refuelling of equipment and vehicles will be undertaken following set procedures to acceptably minimise the risk of spills and to ensure adequate containment and bunding is in place to contain any spills that may occur.
	Spill kits containing appropriate equipment for control, containment and cleanup of hydrocarbon and chemical spills will be available in appropriate locations onsite and maintained. No vehicles or machinery are to be serviced or cleaned within the extraction area.

Risk Assessment

A risk assessment to determine the residual risk associated with the uncontrolled discharge of contaminants is provided below. The risk assessment indicates that with the application of suitable management measures the potential risk associated with uncontrolled discharges is 'Low'.

Table 9. Risk assessment associated with the uncontrolled discharge of contaminants.

Hazard	Source of Hazard	Potential Impacts	Mitigation	Likelihood	Consequence	Residual Risk
Uncontrolled discharge of contaminants to land	Machinery	Contamination of soils and/or water	Refer to Management Measures provided in Table 8 .	1	2	Low

4.5 Dieback (Phytophthora cinnamomi) and Weed Control

Given that native vegetation has largely been altered within the extraction area, dieback indicator species are largely absent and therefore it is not possible to detect whether dieback is present or absent. On this basis, it is reasonable to classify the subject site as 'uninterpretable', denoting that a precautionary management approach should be adopted.

2020

Version 1 Attachment C - Details of Application

Construction

The mobilisation and positioning of equipment associated with a Category 12 prescribed premises could be associated with the introduction/spread of dieback and weeds within the subject site. Accordingly, the management measures provided in **Table 10** are proposed.

Operation

The primary objective of dieback management during operations is to minimise the risk of entry of dieback to the subject site. The risk of transportation via vehicles and equipment is low given that sealed roads will be utilised prior to entering the site.

Management Measures

The management measures proposed for dieback and weed control are provided below within Table 10.

Table 10. Dieback and weed management measures.

Timing	Management Measure
Topsoil removal, excavation and rehabilitation	Training will be provided to all personnel during an initial safety and environment induction course. This will include an explanation of the specific requirements with regard to <i>Phytophthora</i> dieback management.
activities	Fencing and lockable gates will be maintained and used to control unauthorized access to the excavation area.
	Avoid moving surface material or fill material from weed infected areas to non-infested areas.
	As far as reasonable and practicable haulage vehicles are to be cleaned of all loose external soil and plant material prior to entry to and exit from the extraction area.
	Access to the subject site during operation will be restricted to the proposed roads. No other access points should be established. The access location and vehicle inspection point should be clearly sign posted.
	The extraction area will be managed to avoid ponding of surface water where vehicle access is required.
	Trucks will be loaded and covered to ensure there is no spillage of material during transport.

Risk Assessment

A risk assessment to determine the residual risk associated with dieback and weeds is provided below. The risk assessment indicates that with the application of suitable management measures the potential risk associated with dieback/weed introduction and spread is 'Low'.

Table 11. Risk assessment associated with dieback and weeds.

Hazard	Source of Hazard	Potential Impacts	Mitigation	Likelihood	Consequence	Residual Risk
Introduction/spread pf dieback and weeds	Importation of soil/plant material. Onsite movement of soil.	Impacts to the condition of remnant vegetation.	Refer to Management Measures provided in Table 10 .	1	2	Low

2020

Version 1 Attachment C - Details of Application

5 CONCLUSION

Leeuwin Civil Pty Ltd is proposing to extract gravel from a 9.73 ha area located on Lots 2 and 3 Nuttman Road, Chapman Hill.

It is anticipated that approximately 50,000 tonnes per annum of gravel will be processed. The proposal involves the crushing and screening of gravel within the subject site. These activities will require a works approval and subsequent licence pursuant to Part V of the *Environmental Protection Act 1986*.

The following factors are considered to represent the potential environmental and amenity impacts associated with the proposal:

- Noise;
- Dust;
- Weeds;
- Stormwater discharge;
- Uncontrolled discharge of contaminants to land.

A risk assessment has been undertaken for the abovementioned factors in consideration of the proposed management measures whereby the potential environmental and amenity impacts are considered 'Low' for the proposal.

EXECUTIVE SUMMARY

Acoustic Engineering Solutions (AES) has been commissioned by Accendo Australia to undertake an environmental noise impact assessment for the proposed gravel-extraction operations at lots 2 and 3 Nuttman Road Chapman Hill WA 6280. The aim of this assessment is to determine whether or not the noise emissions from the proposed operations would comply with the Environmental Protection (Noise) Regulations 1997 (the Regulations).

An acoustic model is created and four operational scenarios are modelled:

Scenario 1: represents the topsoil strip.

Scenario 2: represents the extraction activities.

Scenario 3: represents the crushing and screening of rock.

Scenario 4: represents product loading.

Nine closest residential premises are selected for the assessments. Noise levels are predicted for worst-case meteorological conditions. The predicted worst-case noise levels are adjusted for their dominant characteristics according to the Regulations, and then assessed against the assigned noise levels set by the Regulations. The compliance assessment concludes that full compliance is achieved for the proposed gravel-extraction operations.

Ground vibration (Peak Particle Velocity (PPV)) levels of mobile equipment are predicted from the published data. The predicted vibration levels are below the low limits for protecting buildings from damage and for human perception at any of the residences.

1.0 INTRODUCTION

Accendo Australia (Accendo) proposes gravel-extraction and production at lots 2 and 3 Nuttman Road Chapman Hill WA 6280. Acoustic Engineering Solutions (AES) has been commissioned by Accendo to undertake an environmental noise impact assessment of the proposed operations. The objective of this assessment is to determine whether or not the noise emissions from the proposed operations would comply with the Environmental Protection (Noise) Regulations 1997 (the Regulations).

Before the extraction and production, topsoil is stripped and stockpiled as water, visual and noise barriers around the pit edges. During this period, three personnel work on site on a day shift between 7am and 3:30pm on Monday to Friday excluding public holidays.

When the extraction and production stops, the gravel is loaded to trucks and then transported away from the site. These trucks run form 7 am to 5.30 pm on Monday to Friday excluding public holidays.

Figure 1 in APPENDIX A presents an aerial view of the subject site and surrounding area while Figure 2 presents the locations of closest residences. Residence UR1 is not approved by the local authority.

2.0 NOISE AND VIBRATION CRITERIA

2.1 NOISE CRITERIA

Noise management in Western Australia is implemented through the Environmental Protection (Noise) Regulations 1997 (the Regulations). The Regulations set noise limits which are the highest noise levels that can be received at noise-sensitive (residential), commercial and industrial premises. These noise limits are defined as 'assigned noise levels' at receiver locations. Regulation 7 requires that "noise emitted from any premises or public place when received at other premises must not cause, or significantly contribute to, a level of noise which exceeds the assigned level in respect of noise received at premises of that kind".

Table 2-1 presents the assigned noise levels at various premises.

Table 2-1: Assigned noise levels in dB(A)

Type of Premises	Time of	Assigned Noise Levels in dB(A) ¹				
Receiving Noise	Day	L _{A 10}	L _{A1}	L _{A max}		
	0700 to 1900 hours Monday to Saturday	45 + Influencing factor	55 + Influencing factor	65 + Influencing factor		
Noise sensitive premises: highly sensitive area	0900 to 1900 hours Sunday and public holidays	40 + Influencing factor	50 + Influencing factor	60 + Influencing factor		
	1900 to 2200 hours all days	40 + Influencing factor	50 + Influencing factor	60 + Influencing factor		
	2200 hours on any day to 0700 hours Monday to Saturday and 0900 hours Sunday and public holidays	35 + Influencing factor	45 + Influencing factor	55 + Influencing factor		
Noise sensitive premises: any area other than highly sensitive area	All hours	60	75	80		
Commercial premises	All hours	60	75	80		

For highly noise sensitive premises, an "influencing factor" is incorporated into the assigned noise levels. The influencing factor depends on road classification and land use zonings within circles of 100 metres and 450 metres radius from the noise receiver locations.

¹ Assigned level L_{A1} is the A-weighted noise level not to be exceeded for 1% of a delegated assessment period. Assigned level L_{A10} is the A-weighted noise level not to be exceeded for 10% of a delegated assessment period. Assigned level L_{Amax} is the A-weighted noise level not to be exceeded at any time.

2.1.1 CORRECTIONS FOR CHARACTERISTICS OF NOISE

Regulation 7 requires that that "noise emitted from any premises or public place when received at other premises must be free of:

- (i) tonality;
- (ii) impulsiveness; and
- (iii) modulation.

when assessed under Regulation 9".

If the noise exhibits intrusive or dominant characteristics, i.e. if the noise is impulsive, tonal, or modulating, noise levels at noise-sensitive premises must be adjusted. Table 2-2 presents the adjustments incurred for noise exhibiting dominant characteristics. That is, if the noise is assessed as having tonal, modulating or impulsive characteristics, the measured or predicted noise levels have to be adjusted by the amounts given in Table 2-2. Then the adjusted noise levels must comply with the assigned noise levels. Regulation 9 sets out objective tests to assess whether the noise is taken to be free of these characteristics.

Table 2-2: Adjustments for dominant noise characteristics

	e noise emission is cumulative to a ma	Adjustment where must		
Where tonality is present	Where Modulation is present	Where Impulsiveness is present	Where Impulsiveness is not present	Where Impulsiveness is present
+5 dB	+5 dB	+10 dB	+10 dB	+15 dB

2.1.2 Construction Noise

Regulation 13(1) states that construction work means "(g) the removal or reinstatement of vegetation or topsoil for the purpose of or in relation to a mining operation".

Regulation 13(2) states that Regulation 7 does not apply to noise emitted from a construction site as a result of construction work carried out between 0700 hours and 1900 hours on any day which is not a Sunday or public holiday if the occupier of the premises or public place, shows that

- (a) the construction work was carried out in accordance with control of environmental noise practices set out in section 4 of AS 2436-2010 Guide to noise and vibration control on construction, maintenance and demolition sites; and
- (b) the equipment used on the premises was the quietest reasonably available.

2.1.3 INFLUENCING FACTORS

Nine (9) closest residential premises surrounding the subject site are selected for detailed assessment, as shown in Figure 2 in APPENDIX A.

No major or secondary roads are located within 450m from any selected residential premises. Neither industrial nor commercial zone is present in the vicinity of the selected residential premises within 450m. The gravel pit (9.73 hectares) is at least 320m from UR1 and more than 500m from the other residences. The gravel pit is zoned as "industrial". Therefore, the influencing factor is zero for all of the closest residential locations.

Table 2-3 presents the day-time assigned noise levels for Monday to Saturday excluding public holidays.

Table 2-3: Day-time assigned noise levels (L_{A10}) in dB(A)

Closest Residents	Influencing Factor in dB	Day-time Assigned Noise Levels (L _{A10}) in dB(A) for Monday to Saturday					
All Receivers	0	45					

2.2 VIBRATION CRITERIA

2.2.1 Building Structural Integrity

Table 2-4 presents the vibration limits for protecting buildings from damage, which is outlined in the German Standard DIN 4150-3².

Table 2-4: Vibration limits to protect building from damage.

Type of Structures		city in mm/ ion at a Fro	Plane of Floor of Uppermost Storey	
7,1000	< 10 Hz	10-50 Hz	50-100 Hz	All frequencies
Building use for commercial purposes, industrial buildings & buildings of similar design	20	20 - 40	40 - 50	40
Dwelling and buildings of similar design and/or occupancy	5	5 - 15	15 - 20	15
Structures that because of their particular sensitivity to vibration and are of great intrinsic value (e.g. heritage listed structures)	3	3 - 8	8 - 10	8

² German Standard DIN 4150:1999, Structural Vibration Part 3: Effects of Vibration on Structures.

_

2.2.2 Human Comfort Criteria

Humans are capable of detecting vibration at levels that are well below those causing risk of damage to a building. Table 2-5 presents the vibration levels for the degrees of perception of humans, suggested by British Standard 5228-2:2009 Code of practice for noise and vibration Control on construction and open sites – Part 2: Vibration.

Table 2-5: Guidance on effects of vibration levels.

Vibration Levels	Effect
0.14 mm/s	Vibration might be just perceptible in the most sensitive situations for most vibration frequencies associated with construction. At lower frequencies, people are less sensitive to vibration.
0.3 mm/s	Vibration might be just perceptible in residential environments.
1.0 mm/s	It is likely that vibration of this level in residential environments will cause complaint, but can be tolerated if prior warning and explanation has been given to residents.
10 mm/s	Vibration is likely to be intolerable for any more than a very brief exposure to this level.

NOISE MODELLING 3.0

3.1 **METHODOLOGY**

An acoustic model is developed using SoundPlan v8.0 program, and the CONCAWE^{3,4} prediction algorithms are selected for this study. The acoustic model is used to predict worstcase noise levels at the closest residential locations and generate worst-case noise contours for the surrounding area.

The acoustic model does not include noise emissions from any sources other than from the proposed gravel-extraction and production. Therefore, noise emissions from road traffics, aircrafts, animals, etc are excluded from the modelling.

NOISE MODELLING SCENARIOS 3.2

Accendo advised that:

- Gravel extraction comprises three cells in a total area of approximately 9.73 hectares.
- During the gravel extraction period, three personnel work on site on a day shift between 7am and 3:30pm.
- In each cell it is estimated that 100mm of topsoil and overburden will be cleared.
- Maximum depth of extraction will be 2m below the existing surface depending on the depth of gravel.
- Topsoil and overburden are to be pushed to outer limits of cell, creating noise bunds of approximately 2 metres in height along pit boundary edges. The 2m high topsoil bund in the east pit edge, as shown in Figure 2 in APPENDIX A, will stay till the completion
- In each cell finished product is to be stockpiled to the East, to a height of 4 metres from the bottom of the pit, as shown in Figure 3 in APPENDIX A. This means that stockpiles are about 2m from the natural surfaces.
- In each cell the production will take place towards West.
- The production equipment will be shift as required, but constantly in the order of extraction, crusher, feeding screener, feeding conveyor belt to stockpile.
- Not all equipment operates simultaneously; this is staged due to lack of staff and expense involved.
- Crushing and Screening of rock are undertaken separately from the extraction. This means that no extraction activities occur when crushing and screening happen.
- A 5m L-shaped bund will be built at about 3m away from the crusher and Supertrak, as shown in Figure 4 in APPENDIX A.

³ CONCAWE (Conservation of Clean Air and Water in Europe) was established in 1963 by a group of oil companies to carry out research on environmental issues relevant to the oil industry.

The propagation of noise from petroleum and petrochemical complexes to neighbouring communities, CONCAWE Report 4/81, 1981.

• After the extraction stops, one personnel works on site to load gravel to trucks on day shift between 7am and 5:30pm. Then trucks transport the gravel away from the site. During the loading truck engine will be switched off.

Four phases are planned:

- Topsoil strip using the following equipment:
 - > A CAT 12M Grader; and
 - > A D9 Dozer.
- Extraction using the following equipment:
 - > A CAT 366FL Excavator; and
 - A CAT 966H Loader.
- Crushing and screening of rock using the following equipment:
 - > A CAT 966H Loader to load rock to the crusher;
 - > Impact Crusher;
 - > Supertrak (Terex Finlay 693+); and
 - > Stacker (Terex Finlay 632).
- Loading products into road trains using a CAT 966H Loader. The engines of road trains will be switched off during the loadings.

Based on the provided information and proposed activities, four operational scenarios are modelled:

Scenario 1: represents the topsoil strip.

Scenario 2: represents the extraction activities.

Scenario 3: represents the crushing and screening of rock.

Scenario 4: represents product loading.

UR1 is the residence closest to the pit. Extraction and crushing at cell 1 represent the worst-case operation for scenario 2 to 4. Therefore, the activities for extraction and crushing/screening at cell 1 and transporting products from cell 1 stockpile are modelled and assessed in this study.

The 2m high topsoil bund in the east pit edge, as shown in Figure 2 in APPENDIX A, is assumed to be present for scenarios 2 to 4.

For worst-case operations, all items of the mobile equipment are assumed to operate on the natural surfaces for scenario 1.

For scenario 2, both 366FL Excavator and CAT 966H Loader are assumed to operate at the bottom of the pit and within 50m from the 2m topsoil bund on cell 1 edge. This scenario is for the operations before the 4m product stockpile is built. After the 4m product stockpile is built, both 366FL Excavator and CAT 966H Loader should work within 50m to the west of the 4m product stockpile.

For scenario 3, the 5m L-shaped bund is assumed at 3m away from the Crusher and Supertrak, as shown in Figure 4 in APPENDIX A. The fixed plant is assumed to sit on the pit floor (2m below the natural surface). Cat 966H loader is assumed to load rock to the crusher.

Product stockpile is not included in the acoustic model. If the 4m product stockpile is included, the predicted noise levels will be lower at the stockpile shadow area (for the eastern receivers: R4 to R7 and UR1).

For scenario 4, the loader is assumed to operate at 1m below the natural surfaces.

3.3 INPUT DATA

3.3.1 Topography

The ground contours for the proposed site and surrounding area are provided by Accendo in AUTO-CAD dwg format. The ground is assumed to be absorptive.

Neither buildings nor sheds are considered in the acoustic model.

3.3.2 Noise Sensitive Premises

Nine (9) nearest residential premises are selected for the assessment, as shown in Figure 2 in APPENDIX A.

3.3.3 Source Sound Power Levels

Table 3-1 presents the source sound power levels. The sound power levels of CAT 12M Grader, CAT 366FL Excavator and CAT 966H Loader are calculated from the manufacture data for overall levels and their spectra are obtained from the AES database for similar equipment. The sound power levels of the other equipment were provided by Accendo.

Table 3-1: Sound power levels.

Equipment	Octave Frequency Band Sound Power Levels in dB(lin)							Overall	
Equipment	31.5Hz	63Hz	125Hz	250Hz	500Hz	1kHz	2kHz	4kHz	dB(A)
CAT12M Grader⁵	97	101	108	103	101	101	98	91	105
D9 Dozer	108	112	117	115	106	107	103	98	112

⁵ With sound <u>suppression package.</u>

-

Equipment	Octave Frequency Band Sound Power Levels in dB(lin)								
	31.5Hz	63Hz	125Hz	250Hz	500Hz	1kHz	2kHz	4kHz	dB(A)
Terex Finlay 693+	108	107	107	106	108	106	102	99	110
Terex Finlay 632	94	95	93	94	88	93	90	78	96

3.4 METEOROLOGY

SoundPlan calculates noise levels for defined meteorological conditions. In particular, temperature, relative humidity, wind speed and direction data are required as input to the model. For this study the worst-case meteorological conditions⁶ are assumed, as shown in Table 3-2.

Table 3-2: Worst-case meteorological conditions.

Time of day	Temperature Celsius	Relative Humidity	Wind speed	Pasquill Stability Category	
Day (0700 1900)	20º Celsius	50%	4 m/s	Е	

⁶ The worst case meteorological conditions were set by the EPA (Environmental Protection Act 1986) Guidance note No 8 for assessing noise impact from new developments as the upper limit of the meteorological conditions investigated.

4.0 MODELLING RESULTS

4.1 POINT CALCULATIONS

Table 4-1 presents the predicted worst-case A-weighted noise levels. The highest noise level is predicted at UR1 for scenarios 1, 2 and 4 but at R3 for scenario 3.

Table 4-1: Predicted worst-case noise levels in dB(A).

Desire to the second	Predicted Noise Levels in dB(A)			
Receivers	Scenario 1	Scenario 2	Scenario 3	Scenario 4
R1	36.4	32.4	39.9	30.4
R2	36.6	33.5	37.6	32.4
R3	39.7	36.1	40.0	34.7
R4	29.6	20.7	24.2	26.3
R5	40.9	31.8	32.0	32.5
R6	39.2	33.7	31.5	22.4
R7	34.7	31.8	38.6	27.9
R8	30.3	23.6	30.6	10.8
UR1	44.0	37.5	36.7	40.0

4.2 NOISE CONTOURS

Figure 5 to Figure 8 in APPENDIX A present the worst-case noise level contours at 1.5m above the ground. These noise contours represent the worst-case day-time noise propagation envelopes, i.e., worst-case propagation in all directions simultaneously.

5.0 COMPLIANCE ASSESSMENT

5.1 ADJUSTED NOISE LEVELS

Noises from the proposed fixed plant and mobile equipment are expected to exhibit tonality. According to Table 2-2, the predicted noise levels shown in Table 4-1 should be adjusted by adding 5 dB.

Table 5-1 presents the adjusted worst-case noise levels in dB(A).

Table 5-1: Adjusted worst-case noise levels in dB(A).

Danahuara	Adjusted Noise Levels in dB(A)			
Receivers	Scenario 1	Scenario 2	Scenario 3	Scenario 4
R1	41.4	37.4	44.9	35.4
R2	41.6	38.5	42.6	37.4
R3	44.7	41.1	45.0	39.7
R4	34.6	25.7	29.2	31.3
R5	45.9	36.8	37.0	37.5
R6	44.2	38.7	36.5	27.4
R7	39.7	36.8	43.6	32.9
R8	35.3	28.6	35.6	15.8
UR1	49.0	42.5	41.7	45.0

5.2 COMPLIANCE ASSESSMENT

Scenario 1 (topsoil strip) represents construction activities. As indicated in section 2.1.2, no assigned noise levels apply to scenario 1 as long as "the construction work was carried out in accordance with control of environmental noise practices set out in section 6 of AS 2436-1981 Guide to Noise Control on Construction, Maintenance and Demolition Sites" and "the equipment used on the premises was the quietest reasonably available".

Scenarios 2 to 4 generate continuous noise emissions. All activities in this project are proposed for the days only (between 7:00am and 5:30pm) on Monday to Friday excluding

AES-890089-R01-2-23102020

public holidays. Therefore, noise emissions should be assessed against the day-time assigned noise levels L_{A10} for Monday to Friday.

Table 5-2 presents the compliance assessment. It is shown that the adjusted worst-case noise levels are not above the day-time assigned noise levels at all of the noise-sensitive premises for scenarios 2 to 4. This means that full compliance is achieved for the proposed operations.

Table 5-2: Compliance assessment.

	Assigned Noise Levels in dB(A)	Adjusted Noise Levels in dB(A)			
Receivers		Scenario 2	Scenario 3	Scenario 4	
R1	45	37.4	44.9	35.4	
R2	45	38.5	42.6	37.4	
R3	45	41.1	45.0	39.7	
R4	45	25.7	29.2	31.3	
R5	45	36.8	37.0	37.5	
R6	45	38.7	36.5	27.4	
R7	45	36.8	43.6	32.9	
R8	45	28.6	35.6	15.8	
UR1	45	42.5	41.7	45.0	

6.0 VIBRATION ASSESSMENT

Ground vibration (Peak Particle Velocity (PPV)) between two points at distances Ra and Rb from a source can be calculated using the following equation:

$$Vb = Va \left(\frac{Ra}{Rb}\right)^{1.5} \tag{1}$$

Where Va and Vb are the PPV vibration levels at locations a and b.

The published data for vibration levels of construction equipment show:

Excavators: 0.2mm/s at 40m⁷.
 Graders: 3mm/s at 10m.
 Dozers: 2 - 4mm/s at 10m⁸.

No published vibration data are available for FELs and crushers. It is expected FELs generate lower vibration than Dozers.

Table 6-1 presents the predicted vibration PPV levels. It is shown that the predicted vibration PPV levels are less than 0.1mm/s at 300m from operating equipment at the pit. UR1 is the closest residence and more than 300m away from the pit. Therefore, at any of the residences the predicted vibration PPV levels are much lower than the limits for protecting buildings from damage and for human perception, as shown in section 2.2.

Table 6-1: Predicted Vibration PPV Levels in mm/s.

Developme	Predicted Vibration Levels in mm/s at Different Distances			
Receivers	10m	20m	100m	300m
Dozers	2.4 to 4	1.4	0.13	< 0.1
Excavators		0.6	< 0.1	< 0.1
Graders	3	1.1	< 0.1	< 0.1

HEAVY VEHICLE HAULAGE ROUTE - EMPTY

Version: 1, Version Date: 20/12/2023

HEAVY VEHICLE HAULAGE ROUTE - LOADED

Version: 1, Version Date: 20/12/2023

No	NAME & ADDRESS	NATURE OF SUBMISSION
1	Department of	The proponent is seeking to amend the operating hours, add an additional haulage route and increase the maximum
	Biodiversity	daily truck movements to 100 truck movements per day.
	Conservation and	
	Attractions	DBCA provides the following advice pursuant to DBCA's responsibilities under the Biodiversity Conservation Act 2016 (BC Act).
		Advice to City
		The original Lot 3 extractive industry proposal documents (2018) indicated that there would be less than 7 additional
		truck movements per day and the proposed haulage route would be northwards along Chapman Hill Road to Busselton.
		Operating Times
		DBCA has no comments in relation to the proposed amendment to approved operating times.
		Additional Haulage route
		Properties subject to conservation covenants to protect the biodiversity values within those lots, and occurrences of threatened flora and Threatened Ecological Communities (TEC) are located adjacent to the proposed additional haulage route. Provided no road widening or upgrades are required to the existing roads, DBCA has no objections to the use of an additional haulage route along Nuttman Road to Chapman Hill Road, travelling west to Roy Road and onto the highway. If road widening or upgrades are required along the proposed additional haulage route due to increased truck movements, then DBCA should be consulted in relation to potential impacts to adjacent threatened flora and TEC vegetation.
		Truck Movements
		The proposed amendment to haulage truck movement numbers is a substantial increase from the original proposal.
		DBCA notes the original application referred to dust management. If the City considers approving the proposal, dust control measures should consider the avoidance of dust accumulation on threatened flora and TEC vegetation, located adjacent to unsealed sections of the proposed additional haulage route.
2	Main Roads	Main Roads has no objection to the proposed amended planning application subject to compliance with any
	Western Australia South West Region	requirements of Main Roads Heavy haulage division.
3	P Repton	In response to your letter dated the 11th of January I make the following
	Chapman Hill	observations. I welcome the changes associated with the proposal being:Aligning truck movements to the school bus pick-ups

		Adding in an additional haulage route.
		Can you please clarify whether the increase in truck movements relate to fifty trucks moving to and from the gravel pit vs. one hundred trucks moving to and from? The concern for me is that fifty and even more problematically one hundred trucks moving to and from the pit will cause more damage to the road shoulders at my property entrance at 196 Nuttman Road. My property entrance is on the right-hand side of the left-hand bend near the top of Nuttman Road as per the attached photographs. I have noted over the past few months that the gravel shoulder at the side of the road at my entrance is being eroded away and that the step off the bitumen to the gravel is getting more exaggerated. I am expecting this to worsen over Autumn, Winter as rain & water run off will soften the edges more than they currently are. It is my assumption that trucks are having to move off the road to the shoulder to prepare for any vehicle movement coming up the hill as they move down, due to the width of the road not allowing two vehicles to occupy the road safely at that point. The more movements, the more wear and tear.
		Considering the proposed amendment to the Development Approval, this would be a perfect time to assess this and other incidental issues associated with the use of Nuttman Road by large trucks. I am putting forward that as part of the proposals conditions of acceptance that the shoulder on this corner and the other on the other side of the road be bituminised and widened to allow for trucks using these shoulders safely. I would also request that gravel be laid at the entrance to my property to aid in supporting the integrity of the works.
4	C & N Howard Chapman Hill	It is not clear from the letter provided to us dated 11th January 2024, why the truck movements now have to double to 100 truck movements per day for the remainder of the operation of the extraction site. This is a substantial increase in truck movements on a rural road network, coming in and out of Chapman Hill which has tourist traffic going to Hippo Lakes Café, to our Cellar Door, and to the Heyscape cabins located on our property, as well as the residents who live in Chapman Hill and use the network of roads already being used by the Leeuwin Civil trucks. I would like it noted too, that Leeuwin Civil do have a history of not complying fully with the DA17/0866 conditions,
		and I have email records that detail these occurrences from when the gravel extraction operation commenced, which included, commencing without a permit to operate from the City of Busselton. As part of my submission objecting to these amendments, I have some questions that I would like answered please: 1. How many cubic metres have been extracted so far from the pit, and why after operating for 2 ½ years do truck movements need to double?
		2. Comparing the PDF page of the extraction area approved in DA17/0866, to a satellite photo from November 2023 provided to me by a neighbour, it appears that Leeuwin Civil are extracting gravel outside of the approved extraction area.

5	B Gratte Chapman Hill	Regarding DA1710866.01 Amendment to Development Approval - industry- Extractive (Gravel) - Lot 2 Nuttman Road and Lot 3 Chapman Hill East Road Chapman Hill WA 6280. Evans Rd is used for the movement by medium and heavy rigid trucks, semi-trailers and road trains (including milk tankers). There is also situated on a bend a school bus turning area. Many push bike riders also use Evans Rd with limited visibility on these riders as they are often in dark clothes, travelling slowly and 2-4 wide on corners. Vehicles and other road users often travel at maximum speed limit. Many of the driveways on Evans Rd are concealed due to the high amount of undergrowth vegetation. The Driveway at 275 Evans Road has had a request for clearing the vegetation to see oncoming traffic through the Busselton Shire portal but no clearing has been completed. Recently there was a near miss with a vehicle using the driveway to turn around in and putting out on a very fast-moving utility. Also prior to my purchase of the property I understand there were other near misses. Near the drive is also a single lane bridge where vehicles use the middle of the road to cross and if there are vehicles coming both ways one is required to stop. Whist I have no objections to the Gravel being moved the safety issues of Evans Rd, Jamison's Rd, Chapman Hill Rd with concealed driveways, concealed road junctions, school bus turning area and a single lane bridge combined with fast moving vehicles - not just trucks are a significant safety issue.
6	J Walker Chapman Hill	I have tried to go the "have Your Say" portal but not having success in logging in and not clever enough with technology to work it out. WE ALL WANT GOOD ROADS AND WE NEED GRAVEL TO DO THAT - so I am not anti the application. However, I have some concerns. Clearly there is already some sort of agreement about the movement of gravel on these roads as there have been gravel trucks going up and down our road for what seems to be forever. As I am reading this it seems the application is to allow increased movements. Here is the first dilemma: Around September/October 2023 I was gardening and as a sheer matter of curiosity I counted the number of gravel trucks going past our front gate over the course of an hour and in that one hour there were 15 trucks. By my maths that is 90 movements over 6 hours, 105 over 7 hours and 120 over 8 hours. Since this application appears to be seeking increased movements one has to assume that they are not complying with whatever the current agreement allows. HOW OR WHO WILL ENSURE THE AGREEMENT IS COMPLIED WITH? My second concern is that there cannot be that many trucks including the milk tankers and stock trucks along with other delivery trucks going up and down the road without considerable wear and tear, What Contingencies has the City put in place to mitigate wear and tear and maintain these roads while this degree of use is taking place? As previously stated I am not opposed to the gravel being transported along our road but I do want assurances that there are proper processes in place to ensure any agreement is complied with and any wear and tear will be dealt with promptly without undue cost to us as local road users.
7	R Mildwaters Busselton	Objection 1. Loss of trees and habitat for wildlife. In these times of logging and development our environment has suffered greatly. It's time to stop destroying the planet. 2. endangering the lives of our schoolchildren as trucks carrying gravel and our school busses should not share the same road. Impact on rare flora and fauna;

8	H Lehman Armadale	Do not think it necessary to increase so much traffic with trucks in the area.
9	M Stewart West Busselton	Objection. Because it is ridiculously over the top to request that many trucks, and will cause so much inconvenience to local residents, and impact on traffic (as it already has broken restrictions regarding not being on the roads at school pick-up and drop off times.) Please do NOT approve this request. Your co-operation would be extremely appreciated.
10	V & J Bussell Walsall (2 submissions from same property)	(1.) This application from Leeuwin Civil is totally unacceptable! It needs modifying and reducing considerably to take account of the adverse effects that such a large-scale proposal would have on immediate pit site neighbours such as us, and the welfare and safely of all the many users of the proposed transport corridor between the Nuttman Road pit site and the Bussell Highway end of Roy Road at Yelverton. Let's not forget Leeuwin Civil have shown clearly over the past two years since extraction from their Nuttman Road pit site commenced, that they pay little, or in many cases no regard for the rules that were put in place before original submissions were called for this project around four years ago. We were never advised for instance that most of the gravel from this site would be trucked by Giant 50-metrelong Road Trains which double the danger and noise levels involved. The dust levels from the unsealed portion of the Transport Corridor have to be seen to be believed. Let's not forget this company has finally decided to apply for a permit to do what they've been doing for the last two years without permission anyway, which is to transport the majority of their gravel from their Nuttman Road pit along Evans and Payne Road using rigs double the size and up to double the numbers of those they stated they would use at the time original submissions were taken. Their lack of compliance with avoiding school bus times by their haulage vehicles and the haulage vehicles of the numerous sub-contractors they sell gravel to, who also pick up from this site, has to be seen to be believed. This Variation proposal in its present form must not proceed!
		In the light of the above, the daily maximum haulage truck numbers to and from Leeuwin Civils' gravel pit on Mr Brian Bakers Nuttman Road property should be officially limited to a total maximum of 50 truck movements per day. The request for this variation to allow 100 truck movements per day is even more unacceptable in the light of the following: Please bear in mind that most of the haulage [as per current haulage practices from this site] will be carried out using huge 50- metre-long double road trains. These huge road trains should be counted as two truck movements as they carry twice the amount of a standard semi and they represent a far greater road hazard and noise and dust concern to neighbours and haulage route road users than smaller standard size rigs. It should also be noted that a further reason for my objection to this Variation proposal is that my old farm house near the start of the un- sealed section of Leeuwin Civil's Nuttman Road transport corridor, has been made virtually unliveable since transport [especially the early 6:15 am commencing transport] by the heavy haulage trucks from Leeuwin Civil's nearby pit site began just over two years ago. My eldest son Daniel and his wife who is a nurse at

PROPOSAL: INDUSTRY – EXTRACTIVE : LOT 2 NUTTMAN ROAD AND LOT 3 CHAPMAN HILL EAST, CHAPMAN HILL SUBMISSIONS CLOSE: 14 February 2024 OFFICER: Andrew Watts

Busselton Hospital lived in our old house until fairly recently but the dust and noise issues from the haulage trucks and pit machines finally forced them to move to alternative accommodation in Busselton.

Finding new tenants for our house in the light of the present circumstances would be virtually impossible.

We really do hope that common sense and fairness will prevail in relation to this Variance application and that a maximum Limit of 50 truck movements per day is officially imposed and that the dust will be properly suppressed as originally promised and that commencement times for haulage trucks into and out of the site and loading and crushing at the site [again as promised when submissions were first called around four years ago] will stipulate that no work at the site or truck movements into or out of the site are to commence prior to 7am.

Yours sincerely Vernon J Bussell Walsall 6280. 12/2/2024.

PS I note that there has been no mention of a further expansion of Leeuwin Civil's Nuttman Road pit site in their Variation request for my neighbour Mr Brian Bakers farming property, involving the clearing of any further native bushland. However just in case such a proposal is being envisaged I must inform those reading this submission that due to the presence of rare and endangered flora and Fawna in the said native bushland, that any further expansion of this extractive industry on the above property, that requires the clearing of native vegetation, will be very strongly opposed by myself and my family and other like-minded neighbours.

(2.) I object to the current amendment as advertised for the gravel pit on Nuttman Rd Chapman Hill. 100 trucks movements for approximately 1 year is too excessive as our house is approximately 20 metres from the road so we get disturbed by all the noise and dust from these trucks which are mostly road trains. As there is No Curfew Times for the trucks put in place under the current arrangement. The trucks and Road trains are arriving at the pit anytime from 6.00am which is happening now already and is of great disturbance to our household. The road is not wide enough for all these trucks and Road Trains and the gravel section is quite narrow with a blind corner. There is a culvert which was never widened and the dust is a constant problem to us as Leeuwin Civil refuse to water the road. Pulling out of our driveway is a hazard when there are so many truck movements (50 movements a day) using this road. To increase these numbers to 100 per day as proposed is totally unacceptable and will make a huge impact on our lives here. The noise from the trucks using air brakes going down the hill and also approaching the blind corners is another disturbance we have to put up with. I object to the new pit times and I would like to see a curfew of NO TRUCKS BEFORE 7am put in place on any working day of the year. The Evans Rd/Chapman Hill Rd intersection needs to be looked at as a safety issue. It is not a very wide intersection to allow for turning trucks and anyone else using the intersection at the same time. I would like to know how many trucks will be using the new Evans Rd route? Our native flora and fauna need consideration as well as some are quite endangered and some species are getting rarer over the years with clearing of native habitat as there is insufficient protection in place. I am totally opposed to clearing of native bush land for any further expansion of the pit.

		Of FIGER: Allalew Watts
11	H Lullfitz	I don't support the proposal to increase truck movements to 100 a day as I believe this is too many for this residential
	Walsall	area. Part of Nuttman Road is a narrow, gravel road - and Walsall Road has a bend whereby the trucks take up the entire
		road and I have had several near misses narrowly avoiding a collision due to the speed of the trucks and the downward
		slope of Walsall Road (for reference the bend is located at -33.784474, 115.344604). Increased truck movements will
		also cause more wildlife deaths on Nuttman Road - endangered cockatoos, reptiles and mammals. In addition I no
		longer have trust that the operator complies with the conditions on the DA due to having the trucks operating during
		school bus times and consistently using Evans Road for the past two years thereby breaching their approved haulage
		route of Chapman Road to the bypass. In conclusion I do not support 100 truck movements a day due to the impact on
		the wildlife, amenity of the area, the safety of local residents walking/biking along Nuttman Road and driving to/from
		their homes.
12	R Gallagher	Objection
	Boallia	As a property owner on the subject route. Payne Road has already become very busy with large truck traffic being
		greatly increased. Significantly endangering local residents, and fauna. To add up to 100 trucks per day, seems
		irresponsible, as to the current roads, and significant dangers this presents. I'm especially worried about young children,
		and local farmers who occasionally will move cattle along the road. Is there an alternative route, or a way to not
		concentrate all the flow to this route?

		OFFICER. Allurew Walts
13	J Bussell	I do not agree with the amendment. The noise and dust levels are currently unacceptable with the present
	Walsall	conditions and lack of compliance. (50 trucks per day) By approving these amendments (which are the main
		compliance issues the pit operator has not been abiding by), gives full reign to legally exploit the issues that have
		been previously raised with the City by nearby residents without resolving them. Unfortunately because of this,
		Leeuwin Civil should not be rewarded. In regards to the clashing of the school bus with gravel trucks, this would
		be largely avoidable if the truck drivers kept to the current curfew times. No trucks should be on the transport
		route before 7.50am anyway, not AT the pit by 7.50 am! Trucks are not time machines and do not just suddenly
		appear on Nuttman road out of thin air! (Nuttman road pit being 20 mins from Busselton Bypass or Leeuwin Civil
		depot) This has been happening regularly along with the unauthorized use of Evans/Jamison/Payne roads to cart
		gravel since the pit first started operating. If trucks were allowed to leave the pit between 7-7.15am, they would
		clash with the school bus on either Chapman Hill road or Payne Rd on the morning run. The afternoon time
		amendments are however far more accurate and acceptable. I do not agree with the increased truck movements.
		The current noise from the speeding road trains is already unbearable, along with our house being showered in
		dust from the gravel road that needs to be watered at least once per day which hasn't happened over the current
		dry spell in the weather this Summer. For future developments, please seal the road to reduce complaints as your
		compliance officer seems unable to rectify this issue. A far more acceptable amendment to the haulage route with
		the increased truck movements which would eliminate the dust and noise for the residents of Nuttman Road and
		school bus route would be to take the gravel out on the south side of the extraction site which has direct access
		onto Chapman Hill East road and gives the option of travelling north or south along the transport route of
		Chapman Hill road. Southwards on Chapman hill road is a great short cut to Margaret River along
		Canebrake/Osmington roads. Or Stuart/Jindong Treeton roads. THIS OPTION should be looked at if the majority of
		submissions aren't in favour from Nuttman Road residents or if the amendment fails. Alternatively the gravel
		should be extracted at a maximum of 50 trucks per day during the winter months if the contractor is unwilling to
		water the road. This week alone there have been road trains arriving at the pit at 6.15 am (not 6.45am) and I find
		it highly unacceptable that the contractor continues to operate outside the specified times. The current curfew
		time of 7.50am for truck movements must be re-enforced including a 7.00am start time at the pit. No earlier
		please.
14	L Clemens	Object Because speed limit is to high needs to be 80kph leaving our property it is already very dangerous with trucks
	Kaloorup	doing110 kph or more with increased activity is a accident waiting to happen.
15	P Shave	It will increase traffic on Chapman Hill Road, the main road from our house into town. Extended use of heavy loads will
	_	damage the road, which in turn causes more traffic delays when fixing. School buses will inevitably be affected, causing delays and safety concerns. The idyllic nature of the area would be lost.

	OFFICER: Andrew watts			
16	M & T Brannan	(1.) I do not support increased haulage traffic or noise in the rural area. I have had to have 2 windscreens replaced from		
	Walsall	stone chips flying up from these vehicles. The roads in this area, including Evans and Jamieson Road, are not wide		
	(2 submissions from	enough to facilitate two way traffic when one of the vehicles is heavy haulage travelling at speed. Furthermore the noise		
	same property)	of these vehicles is intrusive and I would not support lengthening of the times during which they can arrive and depart.		
		(2.) The impact from noise and heavy traffic on our property is already excessive. Increasing to 100 trucks per day		
		driving past our property (more than one every 5 minutes) would make the situation significantly worse. Allowing the		
		additional use of Evans Road for additional heavy truck use is not appropriate - the road is not designed for such heavy		
		traffic volumes. Existing restrictions are also not being followed (40km/h on Nuttman Road, use of Evans Road already		
		despite not approved)		
17	L Bove	Support. The Quicker they start the quicker they finish. I am not agreeing with the industry being there at all and wish		
	North Jindong	they terminate operations the sooner the better.		
18	K & R Russell	(1.) We should all have the right within the law to do as we wish on our properties as long as we are not causing		
	Chapman Hill	harm without having to bow down to a difficult neibour. As long as the rules are being followed I can't see a reason		
	(2 submissions from	to disallow the further development considering the original was passed in the first place.		
	same property)			
	ourse proporty	(2.) Everyone needs gravel for roads etc. The pit is mostly farm land which is not that good for farming any way.		
19	M Sharp	I support this as long as the trucks are not on the road in our area from 7am to 8am and 3.45 to 4.45pm during		
		school bus times. In the past the trucks have interacted with the bus drawing attention to themselves causing unrest		
		throughout this area.		
20	G Moscardini	Object		
		My concerns are for the local families living in close proximity to the gravel pit as well as the native flora and fauna.		
		Increase in the heavy vehicle services traffic on gravel roads may increase risk of accident or injury to school age		
		children waiting for school buses, or parents waiting to collect children from the buses. I am also concerned that the		
		current road infrastructure is not adequate for two heavy vehicles to fit safely when passing. Being a regular user of		
		the road I have seen that gravel transport trucks are using the road during school bus hours and have witnessed		
		several near misses when trucks pass by buses or children waiting. Large amounts of bird and wildlife have already		
		fallen victim to the trucks currently servicing the existing gravel pit and I am concerned that with an expansion this		
		number will increase also. Increased heavy traffic on the current gravel road will also cause road deterioration and		
		potentially increase the risk of accident or injury to other road users. The local community will also bare the brunt of		
		dust and noise pollution that will disrupt the idyllic environment in which they live. This will also have a negative		
		impact on the value of local residents properties if they choose to relocate due to the expansion of this enterprise.		
		This proposal appears to support financial gain over community and environmental impact in area. I urge you to		
		reconsider any expansion of this gravel pit.		
	•			

21	F Bear	State planning policy for extractive industry says that Extraction for Basic Raw Materials should avoid, minimise or
	Yallingup	mitigate any adverse impacts on the community, water resources and biodiversity values. Biodiversity Values: The Local Area where this DA currently operates has 11 bushland protection blocks. All 3 endangered cockatoos are known to breed and habit the area (NUTTMAN ROAD). There are also the western ringtail possums in the area. They have been identified in the biodiversity surveys that were done when these blocks were rezoned from farmland into bushland block prior to the approval of the gravel extraction. Heavy traffic is an identified known risk factor for these endangered species. I request that the decision makers strongly consider these unique and important biodiversity factors in not allowing this proposal.
22	S Parker Perth	Object. Save the black cockatoos
23	I & R McGregor Busselton	We are supportive of this proposal as we think that extractive industry is very important for the development of Busselton and generally support business opportunities in the area. The proposed amendment will have very little impact on the local area as we find the current operators to be considerate and courteous of local needs and expectations and use well known haulage routes. Choosing to live at Chapman Hill is a choice to live alongside agriculture and extractive industry, both essential parts of our community.
24	W Lord Walsall	The proposal gets my support because we need gravel the make roads, roads are necessary for the safe transportation of everything and everyone. There are two things that I would like to bring to the attention of the City and the extractive contractors. 1. School bus curfews be adhered to at all times, the safety of our school busses and the students on them are more than top priority. 2. Notice needs to be taken of residents entrances and the effect these very large trucks have on the safety of landowners gaining entrance onto the haulage routes, especially the entrances on corners. Over the period of the gravel extraction we have found that the truck drivers have been courteous and safety conscious while using our roads.
25	M, F, L & L Goria Walsall (submissions from 4 people at same property)	Objection (1.) This gravel pit operating next door to us has been causing my family and our community a great deal of stress due to multiple issues related to the operator often not following their consent conditions on their DA. 1. There are already too many trucks, often speeding and operating during school bus hours. This has been extremely stressful. One day after my kids got on the bus, I witnessed a loaded truck overtaking the same bus going downhill speeding on Nuttman road. Nothing was done by the City of Busselton for 2 years on this issue despite several complaints and videos evidence provided by my wife. Also, I nearly got killed driving to work, on Payne Rd one way bridge by a speeding gravel RAV truck that forced me to hit the bridge guard rails. The driver did not stop and I was so shaken I could not drive further and I did not manage to see the number plate. I was not able to work that day, having to cancel a full day of very sick patients as I was very shaken by the incident. My wife has been extremely worried ever since about my safety and that of the kids. Furthermore, she has developed PTSD since these incidents and has panic attacks, flashbacks and nightmares of these events; being a psychiatrist am very concerned about her mental health. We have been forced recently to take our children off the bus and you can imagine that this is a significant inconvenience if you live 20 minutes from Busselton town. 2. Noise pollution. I started noticing a very loud operation noise from January 2022 starting regularly at the early hours of the morning eg from 6 am on some days but

PROPOSAL: INDUSTRY – EXTRACTIVE : LOT 2 NUTTMAN ROAD AND LOT 3 CHAPMAN HILL EAST, CHAPMAN HILL SUBMISSIONS CLOSE: 14 February 2024 OFFICER: Andrew Watts

regularly at 0630. The reversing beeping sound of their machines goes on often all day, this is very stressful. 3. Dust. Being also a medical doctor, I am particularly worried about the health impact of the fine silica that is produced by these sites and pollution in the air. Silica dust is harmful when inhaled into your lungs. As it is 100 times smaller than a grain of sand, you can be breathing it in without knowing. Exposure to silica dust can lead to the development of lung cancer, silicosis (an irreversible scarring and stiffening of the lungs), kidney disease and chronic obstructive pulmonary disease. There were dust mitigating strategies included in the DA and stipulated by DWER that have not been adhered to.

Especially in regard to the stockpiling and the rehabilitation. Again, after several complaints, and with the city having a Dust Law in place nothing has been done about this. In conclusion, I am strongly opposed to these requested amendments by Leeuwin Civil. They do not follow the rules and already caused enough stress to our family. I can not compute why they would be granted 100 truck movement a day after many complaints from several neighbours. It is concerning that they have not been reprimanded for their total disregards to the local community. Why should the City Approve this amendment rewarding their bad behaviour?

(2.)

- (a) Leeuwin Civil has not followed dust management procedures. Only 2 ha at a time are meant to be worked on. Dust emissions are seen escaping site when ever its windy which is very frequent in up on Nuttman Hill. No more work or extraction should be allowed until he is made to rehabilitate what is already been worked on. Please see video taken Monday 12/02/24 dust blowing towards my property. Why isn't the city enforcing its dust laws?? (video provided to the City)
- (b) Why do they keep stocking when their dust management plan said they would not? Why isn't the city using their dust laws to fine them? They have extended their welcome on our street next to my property causing dust emissions and pollution (photo provided to the City)
- (c) How many more chances do they get? They have repeatedly operated before 7.50am including COB trucks. Who is going to keep monitoring these trucks. Especially 100 of them and a new much longer route?? (video provided to the City)
- (d) How can the city regulate when they themselves break bus exclusion times? 30/08/23 8.50am on Nuttman rd. (video provided to the City)
- (e) How did the city gove completion certificate in June 2022 when noise bunds where not done? I email's complaining and Paul Needham said he had done a full investigation and found nothing wrong. I think I have suffered enough through the hands of Leeuwin Civil and City of Busselton. I do not consent to them being here any longer. Why isn't the city prosecuting Leeuwin Civil for the many breaches? (photo provided to the City)
- (f) Just one of many occasions the trucks shared this road with my children school bus!! (video provided to the City)
- (g) Operation start time is from 7 am. How are Leeuwin Civil going water road, load trucks in 20mins before school bus times? As it is Leeuwin Civil has already been operating before 7am for the last 2 weeks. Waiting for compliance officers to come and collect their own evidence???? (video provided to the City)
- (h) Leeuwin Civil should not even be operation right now as it is as they do not follow the rules. Please see attached documents. Additional Information

		OFFICER. Allulew Walls
		(3.) I do not support this proposal because it's already dangerous on the road with 50 truck movements and people like to cycle and walk their dogs on Nuttman road so if we were to have 100 truck movements it would be like having an earthquake while trying drive your car, cycle or walk you dog on Nuttman road.
		(4.) Brian Baker is my neighbor. He used to be our friend. He made and broke many promises. I am getting my Ls soon and I worry about having to drive with these trucks on our road. Already with 50 trucks it is stressful for my mum. The trucks often drive in the middle of the road. 100 trucks means every time we leave home we will be encountering trucksit does increase the risk of accidents on our roads and our daily risk on the road.
26	T & C Newton	We attended both council meeting on the 29th and the 31st January and heard two people asking some very valid questions of council regarding this. (we have attached just some of the points the young lady is concerned about). Their frustration at not being heard by the City was evident. Why are the surrounding families finding it so hard to get legitimate answers from the City? This is clearly having a negative impact on their daily lives. State planning policy for extractive industry says that Extraction for Basic Raw Materials should avoid, minimise or mitigate any adverse impacts on the community, water resources and biodiversity values. Biodiversity Values: The Local Area where this DA currently operates has 11 bushland protection blocks. All 3 endangered cockatoos are known to breed and habit the area (NUTTMAN ROAD). There are also the western ringtail possums in the area. They have been identified in the biodiversity surveys that were done when these blocks were rezoned from farmland into bushland block prior to the approval of the gravel extraction. Heavy traffic is an identified known risk factor for these endangered species. According to Birdlife Australia 90% of cockatoos that are admitted to hospitals are there because of collision with a vehicle. The federal government has made a commitment to the protection of these species. The Baudin Cockatoo's are in fast decline and they are only found in our south west. Allowing 100 trucks on Nuttman Road would be putting extra stress on these majestic birds which the City should be doing everything in its power to avoid further stress on these community of endangered species. The current DA is only approved to use Chapman Hill Road. Wasn't Chapman Hill Road upgraded for this pit? How much did that cost and who paid for it? Leeuwin Civil is now asking for an extra Haulage Route in addition to Chapman Hill Road. They want to go down Evans Road towards Roy Road to Bussell High HWY to service their "south client" And they want to increase to 100 trucks. Who ar

PROPOSAL: INDUSTRY – EXTRACTIVE : LOT 2 NUTTMAN ROAD AND LOT 3 CHAPMAN HILL EAST, CHAPMAN HILL SUBMISSIONS CLOSE: 14 February 2024 OFFICER: Andrew Watts

Margaret River, After all, it is our rate pavers money that goes into fixing the roads afterwards. Basic Raw Materials are limited Resources and the city should be regulating where it is going and mitigating the impacts it is having in the entire Busselton community for the benefit of a few. Especially when it comes to the safety of local road managed by our local governments. Safety Concerns: They are asking for 100 truck movements a day and new Route. I have been asking for a Traffic Impact Assessment as it is a condition of the original DA - 6.6. I have asked several times for this document from the city staff – I still have not received this. The new Route is quite long from Nuttman Road after it hits Chapman Hill it will turn into Evans than all the way to Roy Road. Doesn't Leeuwin Civil already have pits near Roy Road to access Bussell Hwy way which means they do not need to have all these RAV travelling all over these country roads to reach Bussell Hwy. I thought Lot 2 and 3 Nuttman gravel pit was approved for his 'North costumers'. DWER Crushing limit - I also do not understand why Leeuwin needs 100 truck movements when they are only approved by DWER to crush 50 000, a year. Wouldn't a 100 truck movements a day allow them to cart a lot more than they are allowed to crush? Especially if they use the RAVs? There is no mention of an increased output on the DA amendment to match the increase truck movements? City of Busselton should consult with MainRoads if they are going to have 100 trucks on Nuttman Road and Walsall Road to ensure it is safe and meets RAV guidelines....as both road are meant to be a low volume road. These roads do not meet the guidelines for a high volume road. Who will make sure Leeuwin Civil comply with Mainroads requirements of not having RAV enter until the other has exited? Where are these 100 trucks going to sit and wait? Chapman Hill Road? Doesn't seem like a safe option. And who will ensure they comply with the 40km/h? If Mainroads are the ones that have to ensure that RAVs comply with these restrictions than they should be notified of this request to make sure they are comfortable with it and have the resources to be able to monitor the number of trucks being requested. (1.) While I am not directly against the proposal, I have some significant concerns regarding the changes. In regard to condition 6.3, is a 45 minute 'window' sufficient to allow for differences in the time(s) of the School bus travelling along the route followed by the trucks, I normally see the School bus pass my property (366 Nuttman Rd) in the mornings at approximately 7:25 am (outbound) and 7:35am (inbound) each morning, but this can be +/- up to 10 min of these times on any given day, in the afternoons the times I have seen the bus pass have been approximately 4:30 (however I don't normally see the bus at this time so I cannot comment on the +/- time, but I

property)

(1.) While I am not directly against the proposal, I have some significant concerns regarding the changes. In regard to condition 6.3, is a 45 minute 'window' sufficient to allow for differences in the time(s) of the School bus travelling along the route followed by the trucks, I normally see the School bus pass my property (366 Nuttman Rd) in the mornings at approximately 7:25 am (outbound) and 7:35am (inbound) each morning, but this can be +/- up to 10 min of these times on any given day, in the afternoons the times I have seen the bus pass have been approximately 4:30 (however I don't normally see the bus at this time so I cannot comment on the +/- time, but I would assume that it will be similar to the morning times). In regard to condition 6.4, I have on several occasions followed trucks leaving the site and travelling along the proposed route (at least as far as travelling down Evans Rd), which indicates (to me at least) that some of the trucks from the site are using a route not approved in the initial application (and brings up the question 'what else are they doing without approval?). I have no objection to the changes to the haulage route, the fact that I have observed trucks following this route already leads me to question the integrity of the operation. In regard to condition 6.5, increasing the truck movements to 100 movements per day for the remainder of the pit life. Given the opening time of the site (6:45 in the amended proposal), and the curfew hours for the School bus (1:30), assuming the site is closing at an equivalent time to the opening time (5:15pm), this will give a daily 'operating' time of 9:00 hours, this would give a truck movement (approximately) every 5.5 minutes, if they were spread evenly through the operating time. Is the current road capable of (safely) handling this many truck movements, in addition to the current traffic of residents and visitors,

		OFFICER: Andrew Watts
		and is the road itself capable of handling the increase in heavy traffic wear and tear?
		(2.) 1. 45 minutes is not sufficient time for the school bus to drive out to the end of its run and back, stopping numerous time to pick up or drop off students. 2. Is for main roads, the council and the residents along the route to decide. 3. I do not believe that Nuttman Road was constructed for heavy haulage and 100 movements per day is excessive.
28	F Salva Cowaramup	We are already experiencing a very heavy traffic on my road
29	G Garcez Margaret River	I live in Margaret River and the road between Busselton and Margaret River is already so busy and dangerousadding another 100 heavy vehicle passing through Cowaramup will heavily impact our community and the safety of commuters to and from Margs to Busselton everyday. Extractive industry should be kept local to local shires to minimise impact on our already busy dangerous country roads.
30	K Kleinschidt Dunsborough	11 bushland protected blocks. On a road with endangered cockatoos. They're only meant to cart 50,000 m³ a year so why do they need 100 truck movements a DAY. So wrong
31	V Hopkins Chapman Hill	My submission is that the trucks are STRICTLY POLICED so that they are not on the roads during school bus times, morning and afternoons. And that the trucks are spaced apart. My driver, last week, had 5 trucks in a row passing her on the opposite side of the road on Evans road - some doubles and some singles. A lot of my Carers also have small cars, and the truck movements like this are a danger to them, especially on corners where the trucks swing wide towards them and - they have told me - that they have had to back back out of the way. Thanking you.
32	E Minarik Vasse	I don't think these roads are made for this quantity of heavy traffic. Country roads with school buses and heavy trucks don't mix well at 110 km speed limits. It's an accident waiting to happen.
33	P & C Orr Metricup	Whilst we understand Roy Rd is a designated truck route, the road traffic is very busy without the proposed increase. During the day and through the night the truck movements are high with milk tankers, vintage trucks, transport, COB trucks to name a few and our preference is to not increase the number of trucks due to noise and safety. Thanks for your consideration
34	R & S Prudham Cowaramup (2 submissions from same property)	(1.) This is the craziest idea yet. I live in Cowaramup and the road between Busselton and Margaret River is insane with traffic already. It's really busy and dangerousadding another 100 heavy vehicle passing through Cowaramup will detrimentally impact our community and the safety of commuters to and from Margs to Busselton everyday. A pit should be kept local to local shires to minimise impact on our already busy dangerous country roads. I think this should be referred to Main Roads for review due to the number of trucks and the distance they will be traveling. (2.) There is already too much traffic between Margaret River and Busselton. Additional trucks will only slow the traffic down even more and its just dangerous. There has to be a better options that won't impact the locals so much or be so dangerous.

roads. I think this development is out of scale with the area and the people and the wildlife that live there. I understand there will 100 truck movements on Nuttman Road every day. That is very likely to have a detrimental impact on nesting, roosting and foraging black cockatoos that use the bush blocks in the area. This development needs to be declined and an alternative area found for this traffic heavy, extractive industry. Council has a unique opportunity here to preserve habitat and roosting trees for the endangered black cockatoos. Stat planning policy for extractive industry says that Extraction for Basic Raw Materials should avoid, minimise or mitigate any adverse impacts on the community, water resources and biodiversity values. Biodiversity Values: The Local Area where this DA currently operates has 11 bushland protection blocks. All 3 endangered cockatoos are known to breed and habit the area (NUTTMAN ROAD). There are also the endangered western ringtail possums in the area. They have been identified in the biodiversity surveys that were done when these blocks were rezoned from farmland into bushland block prior to the approval of the gravel extraction. Heavy traffic is an identified known risk factor for these endangered species. According to Birdlife Australia 90% of cockatoos that are admitted to hospitals are there because of collision with a vehicle. The federal government has made a commitment to the protection of these species. The Baudin Coacktoos are in fast decline and they are only found in our south west. Allowing 100 trucks on Nuttman Road increases the risk of vehicle strike and very few cockatoos survive and those that do survive are so badly injured they		1	OFFICER: Andrew Watts
concerned at the number of trucks that thunder down the road, especially during school bus times. I have a good friend who lives in the area and she is very concerned that trucks are using the road at the same time as the school bus run. I have spent the past two years working to save the black cockatoo. I am the filmmaker behind Black Cockatoo Crisis. I have witnessed first hand the impact of trucks on birds, especially trucks that are unpoliced on back roads. I think this development is out of scale with the area and the people and the wildlife that live there. I understand there will 100 truck movements on Nuttman Road every day. That is very likely to have a detrimental impact on nesting, roosting and foraging black cockatoos that use the bush blocks in the area. trees for them. This area cannot be viewed in isolation. It's a small part of fractured bushland that is barely enough to			
			feed them. Please watch the movie Black Cockatoo Crisis (on SBS On Demand) if you do not understand what they are
facing. The Baudins could be extinct within the next decade. You have the power to save this highly valued piece of			
property and I urge you most strongly to do that. Do you want that to be your legacy?			
37 T Levick-Godwin The house at 71 Nuttman Road is quite close to the road and is affected badly by the trucks with engine noise and	37		· · · · · · · · · · · · · · · · · · ·
Walsall vibrations which can make the whole house shake including the windows. Unfortunately, I have stage 4 Melanoma		Walsall	
and the truck noise and vibration definitely affect my well-being and my ability to rest. Furthermore, I strenuously			
object to the final point of the amendment, 6.5, to basically double the number of trucks on the roads. Walsall Road			
in particular, is a small road with blind corners and in the past, I and some of my neighbours and visitors, have had			
swerve to avoid meeting a truck coming the other way. I have also observed on many occasions trucks struggling to			
turn onto Walsall Road from Chapman Hill Road as there appears to be inadequate room if a drivers needs to turn			
			right onto Chapman Hill Road. I would be most grateful if you would give my points careful consideration. Thank you.
38 D Alers Road safety is reduced and degradation of roadways increasing risk of accidents. Too many additional truck	38		
Quindalup movements on all roads.		Quindalup	movements on all roads.

		OFFICER: Andrew Watts
		Response to 'Amendments sought to DA17/0866.'
		As to point 1. Regarding Condition 6.3.
		No objection.
		As to point 2. With regards to condition 6.4.
		Stated in condition 3.8 'the resource can be transported anywhere once it reaches the Chapman Hill/Busselton Bypass intersection.' While in condition 3.7 it describes that the semitrailer trucks added to the roadways is 7 per day. The proposed additional route will add an extra 5 corners into the route. Each corner adds time to the trip and may increase the risk of accident incidences. A major part of the proposed additional route is on unmarked roads. These roads permit traffic to drive at limits, currently 100km/hr for trucks. The lack of centre lines and high speed increase the likelihood of traumatic accidents. In part the opportunity of an accident is increased by the various users of the roadways who travel at vastly different speeds. Along the proposed route there are many private and hidden property entries. Many of these are close to the road verge such that vehicles are nosed onto the roads while gates are secured. These roads also do not have sealed edging to allow pedestrians and bicyclists to evade the pathways of fast moving large vehicles. Full objection to point 2.
		As to point 3. With regards to Condition 6.5.
		As to point 3. With regards to Condition 6.5. Full objection.
		Increasing truck movements – which is in both directions one full and one empty, from 7 to 100 per day is to taxing on any amount of road, regardless of how many routes are proposed.
20	T. C. I.	All stated for point 2 are relevant here.
39	T Ealing	Late letter of submission to Councillors
		Dear Councillors, I realize that the opportunity for Public Comment on DA17/0866.01 has closed but I feel it is imperative that I be allowed an opportunity to report my experiences and findings in this matter so that all Councillors can decide on sound and up to date information.
		When you live next to a gravel Extraction such as this one on Lot 2 and Lot 3 Nuttman Road Chapman Hill East Road unless you have been out to this location it would be hard to imagine what is happening out there. My first encounter on the morning of 27 th February,2024 was to pull off the road as an 8-wheeler dump truck turned suddenly left out of a
		driver way on my right-hand side to travel towards Busselton. I pulled off the road as a full-frontal collision would have been likely as this truck driver had no intention of slowing down as he took up the whole road. To my surprise there was a semi trailered truck right up close behind him as well. He was so close to the first truck he was not visible to me until the White dump truck past my position. If I was not watching what I was doing an accident would have occurred! When you drive into 748 Nuttman Road there is a large gravel extraction pit and stockpile on the left side which seems
		far too close to the residential home that their amenity and enjoyment of their land would have to be affected without doubt. Over the long weekend we had strong winds from the North East blowing the dust around unabated as the landowners
		and operator did not employ their water truck to keep the dust down on DA20/0438 on Lot 1758 Gulberti Road Busselton. So as with M Goria we both rely on the requirements of the Development Application to cover all aspects of

		OFFICER: Andrew Watts
		protecting us the residents near the pit whether in use or not. But that does not occur in our experience. Depending on the wind direction and intensity especially if the rehabilitation is not done by reintroducing trees or even ground cover the top soil becomes dry in the summer and just blows everywhere. This rehabilitation is supposed to be done after every 2-hectare area is exhausted of gravel or sand. There are no Compliance Officers Rostered on to witness these events that cause things like me seriously coughing when lawnmowing on my property. When we notify the City of Busselton no one listens or investigates as by the time our emails are read it is after the weekend and nothing is done. So, when considering the contents of a Development Application and voting on whether to accept it or not as a Councillor it should be now obvious that there is so much more to consider to truly represent the interests of the residents near these operations both in working and non-working hours. To the point that it may be prudent and important to advise the Applicant and Resident to seek legal advice or mediation so that at the time of determination of whether the application is in agreement between all parties so it can be approved or needs to go to arbitration. That would release the Councillors from any adverse reaction to their voting decision! I would consider that the legal costs in this instance should be met by the applicant as it they who are bringing this matter about and the recipient is only protecting their amenity and enjoyment of their property! I would be happy to be given a reasonable amount of time to address the Councillors at the deciding meeting before the vote is taken to approve this matter as it is a decision that infringes on at least 5 years of the resident's life that may stop them from enjoying their amenity and enjoyment of their property as it has done with us! Forwarded for your information and attention.
40	Signed by 24 people H Williams Chapman Hill I McGregor Chapman Hill B & S Layng Chapman Hill R & C King Chapman Hill M & J Sharp	Support. We the undersigned are supportive of Amendment to Development Approval-Industry-Extractive (Gravel)- Lot 2 Nuttman Raod & Lot 3 Chapman Hill East Road. (DA17/0866.01) As Locals in the area, we understand that extractive industry is an essential part of infrastructure development of Busselton. We are grateful for the recent upgrade of roads as a result of extractive industry in the area. We find the current operators of the Nuttman Road pit to be courteous and considerate of locals needs area and use known haulage routes.
